"THE WHITMAN SADDLE CO. carried off honors at the World's Fair, Chicago, having been awarded NINE first-class medals, more than all American and European competitors together. Among the saddles which received prizes were the Whitman park, hunting, military, and the lady's "cut-back" reversible saddles. The last has only recently been invented, and is the only "reversible" lady's saddle having a "cut-back," and which can be changed at short notice to either near or off side. The Whitman Saddle Co. is to be congratulated, as it led all other American as well as European exhibitors, and carried off the honors against the whole world."—*The Rider and Driver*, Oct. 14, 1893.

Our Illustrated Catalogue is mailed to CENTURY readers for three 2-cent stamps; it contains a description of "the Whitman Idea" and of everything else for rider or driver. A novel little device for holding the trousers down when riding, the "Whitman Ready Riding Strap," 50 cents per pair, post-paid.

Castoria

For Infants and Children.

Castoria promotes Digestion, and overcomes Flatulency, Constipation, Sour Stomach, Diarrhoea, and Feverishness. Thus the child is rendered healthy and its sleep **natural**. **Castoria** contains no Morphine or other narcotic property.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D.,
111 South Oxford St., Brooklyn, N. Y.

"For several years I have recommended your 'Castoria,' and shall always continue to do so, as it has invariably produced beneficial results." EDWIN F. PARDEE, M. D.,
125th Street and 7th Ave., New York City.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach."

CARLOS MARTYN, D. D.,
New York City.

The manufacturers of the famous
CHRISTY BREAD KNIFE
 offer a
 New Nine Hundred Dollar
 Upright Grand
STEINWAY PIANO,
 Style X—7 $\frac{1}{3}$ Octaves, Ebonized Case,
FREE!

To the person who sells most of their goods between now and December 31, 1894. Send \$1.00 for sample set of knives, which will enable you to begin work at once. Further particulars concerning this, the greatest Premium ever offered by a responsible manufacturer, sent on receipt of request.

The Christy Bread Knife is guaranteed. Money refunded where dissatisfaction exists. It is the only new idea in cutlery for years. Exhibited daily in the Model Kitchen at the World's Fair as the Model Bread Knife. Endorsed by Mrs. Emma P. Ewing and other household authorities.

Wherever tried it is always a favorite. By reason of its peculiar wavy edge it cuts hot, new bread thin as old, cuts frosted cake, etc., without breaking, and makes carving a pleasure. It is the greatest knife ever invented for the household.

It is no trouble to sell these knives. Every housekeeper who sees them wants them. Your friends will be glad to help you get this splendid Piano—the finest make in the world. Never mind whether you have done work of this kind before or not. Experience is not necessary. Perseverance and industry will win the day.

Florence Silk Mosaic.

Hand Embroidery on Washable Neckties is popular home needlework. A new fabric woven expressly for this use is called Florence Silk Mosaic—colors: cream-white, black, tan, navy-blue, and old-blue.

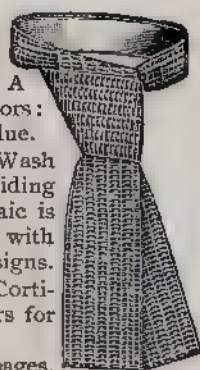

The embroidery is done with Corticelli (EE) Wash Silk, as sold on spools, which keep it clean, avoiding waste, thus saving time and money. The Mosaic is sold in patterns cut the right length for a tie, with working plan, directions, and many new designs.

"Florence Home Needlework" for 1894 is now ready. Subjects: Corticelli Darning in 22 new designs; Knitting; Crochet and Correct Colors for Flowers, embroidered with Corticelli Wash Silk.

Send 6 cents, mentioning year, and we will mail you the book—96 pages, 90 illustrations.

NONOTUCK SILK CO., Florence, Mass.

THE ILLUSTRATED
LONDON NEWS.

A MEDITERRANEAN TRIP IN WINTER.

IT was once truly said that "All roads lead to Rome," but to-day we may make a reversed proverb, and declare that "one road leads everywhere." That universal highway is old Father Neptune's salt water turnpike. You *must* take his road if you mean to see new lands, and, if you are a true American, you either have seen the Old World or will go abroad as soon as you can.

The turtle and the snail are poor models for speed, but show their good sense in one respect—when traveling, they take their dwellings with them. You may travel with the speed of the sea-gull, and take your shelter and home comforts with you. How? Travel by ocean-steamer *all the way*. A trip abroad is interesting, however made; but it may be comfortable and restful as well. Changes, transfers, and shifting of baggage may be avoided, and that while visiting the most delightful and most impressive cities of the world.

Palace-cars ashore and steam-yachts at sea are millionaire's luxuries; yet all the comfort these can offer is found in modern ocean-steamers of the first class. The German Mediterranean Service, maintained by the North German Lloyd Steamship Company, and the

Hamburg-American Line, is the only direct line of first-class steamers between America and the Mediterranean.

Upon its shores, as every Vassar graduate knows (it is time Macaulay's school-boy made way for his feminine successor), flourished the unfathomed ages of old Egypt, the glories of Rome and of Greece, and the commerce of far Cathay.

From this blue sea, the traveler finds ready access to the regions of the Old World that retain the antiquity we seek in going abroad.

Escaping the fogs, cold winds, and more frequent storms of the Northern Atlantic, the sea-voyage of five days brings the traveler within sight of the Azores, long the western boundary beyond which no mariner ventured. Rested and refreshed by the sepa-

ration from home cares, stimulated by new scenes and new acquaintances, the next three days of coasting along Portugal, passing Capes St. Vincent and Trafalgar, make the traveler eager to land when the eighth day finds him at the gate of the Mediterranean—the great rock of Gibraltar, one of the “Pillars of Hercules.”

Inaccessible on all but the fortified westside, this great lion-shaped fortress guards the strait effectively, and well typifies the British lion watching over his eastern possessions. The rock-galleries and ramparts may be visited, and the view from the highest point of rock is superb.

Gibraltar to the railway station of Algeciras, you find yourself living real “Sevillian” days and may see the Cathedral, whose exquisite Giralda tower, the finest in Spain, suggested that of the Madison

The steamer remains here for several hours, giving time to see the principal features.

You may leave your steamer here and remain longer, resuming your journey upon another vessel of the line. The winter months are best for this part of the trip, since summer heat here is often oppressive. If you stop over, you will find it possible to make a side journey to Morocco or in Southern Spain. The interesting old port of Tangier, for instance, has excellent hotels, and yet a few steps from their comfort one can see that life with which the “Arabian Nights” have made all familiar. Crossing from Tangier to Cadiz, or directly from

Square Garden, New York. Seville was once the capital of Spain, and is full of antiquities—Roman and Moorish. From Seville to Cordova, thence to Granada and its Alhambra, and, by way of Malaga, back to Gibraltar, is a journey that will make real some castles in

Spain and the remembrance of them will be a priceless possession for ever after.

Of course it is impossible here to give more than a list of suggestive — perhaps tantalizing — names. If you wish to plan your own routes, you should write to the *North German Lloyd*, or the *Hamburg-American line*, New York, for fuller details.

From Gibraltar, your steamer goes on to Algiers, whose French masters make the new town a comfortable resting resort for even the invalids attracted by its equable, dry climate, while Arabs, Moors, Turks, Kabyles, and negroes lend picturesqueness to the old upper town. Henry Blackburn says, "For artists, Algeria seems perfect," and he advises "all who seek a new sensation" to "pay a visit to the 'city of pirates,' to the diamond set in emeralds on the African shore." Dumas, too, has sung its praises.

After a week or two in Spain or Africa, the traveler may resume the steamship journey, and

sail past Capri, Procida, and Ischia, into the most beautiful harbor of the world — the bay of Naples, over which towers the sullen crater of Vesuvius. The tourist who has a quick eye for the picturesque in costume or incident will find Naples a veritable horn of plenty. The inhabitants live in the open air, and nowhere is there a race more animated and expressive in gesture.

All about the famous cities and towns: Posilippo, with its tomb of Virgil; Castellamare; Sorrento, celebrated as the birthplace of Tasso, and for its scenery; Pozzuoli, with its Grotto del Cave; Baiae, where rich Romans had their

country-houses; Misenum, Portici—the whole region is history made manifest.

Upon the slopes of the volcano, Pompeii and Herculaneum, the fossil cities, would in themselves richly reward a lifetime of study. And Capri, with its unique blue grotto, Salerno and Paestum, will well repay the tourist.

But all about lies sunny Italy, and a journey of five hours by railway will bring the tourist to old Rome herself—the Eternal City, still the capital of the world, and the home of art, religion, and history. It is hardly necessary to advertise Rome. To describe the attractions of Rome in a few words would be equivalent to packing the great pyramid into a gripsack. But it can do no harm to remind the reader of a half-dozen names, leaving his imagination to suggest the realities they represent.

The Colosseum, St. Peter's, the Vatican, the Capitol, the Forum, the Baths, the Pantheon, the Tiber,—if it is part of a liberal education to *read* of these things, how much more important to *see* and really *know* them!

Genoa "the superb," where palaces crowd one another along the old streets, and are enriched with sculpture and paintings, was from the eleventh to the eighteenth century the capital of a powerful republic, and the city to-day is grand and imposing. Besides its own attractions, Genoa offers the advantage of being an excellent point from which to connect by rail or sea with Nice, Mentone, San Remo, Florence, or Venice.

You may also, from Naples or from Genoa, as you choose, go by steamer to Egypt or the Holy Land, and revel in ruins and the past.

What trip offers more of change, comfort, novelty, rest, or presents subjects better repaying study and research?

You leave winter behind, and gain a world in exchange.

LADY EVERETT & MEAD, Architects.
House of Prof. Alexander Graham Bell at Cape Breton.

ONLY MEDAL AND AWARD

ON SHINGLE STAINS AT THE WORLD'S FAIR GIVEN TO

Dexter Brothers' English Shingle Stains.

This Shingle Stain used on the new houses of Ex-Sec'y Stephen B. Elkins, Prof. Alexander Bell, of Bell telephone fame, and Mr. Rudyard Kipling.

A shingled house, if painted, is not artistic. A moss-green roof cannot be obtained by the use of paint. We will send you samples of any color of stain if you will write to us. We study the harmony of colors, and can suggest effects you have not thought of in staining. Send for sample boards to

DEXTER BROTHERS, 55 Broad Street, Boston, Mass.

Send for new 48 page book of designs.

Some Architects plan 17-Story Buildings. I never have, but I do draw little, cheap cottages,
and beautiful ones. Now and then I have even a \$250. building to have a tasteful and artistic effect. I believe
I have seen more success with such a plan than if my competitors, and people who buy my book and
order plans from me say I am not. My book "Picture Cottages" contains 100 plans for floor plans
and elevations of houses of various styles and sizes. It is 24 in. x 36 in. x 1/2 in. I give correct estimates and
specifications. I would a complete set in 10 days and I would build a house on a shore
or mountain, or for a cottage home which best to if the money will be a joy forever, send for this book.
Price, by mail, 50 cents. Also a Book of House Plans from 10 to 100 ft. x 100 ft. A Book of
Single Stories, 50 cents. **E. E. HOLMAN, Architect, 1020 Chestnut St., Philada., Pa.**

TWIN BEDS

of BRASS have supplanted the old-fashioned double bed among the better classes in England - the change being largely due to the advice of scientific men and physicians. 'T is poison to breathe again the human breath.

Twin Beds prevent such dangerous inhalations.

Twin
Bedsteads,
\$20 up.

These metal bedsteads do not harbor vermin, they add beauty and cheerfulness to the bedchamber, while in summer there is about them a delightful air of coolness which invites repose. The metal in our beds never tarnishes in any climate. Mr. B. R. BARKLOW, at our American branch (15th St., between Broadway and Fifth Avenue, New-York), will send illustrations with estimates on request, with postage. Largest stock in the world

BOOKS

Dodd, Mead & Company's New Books.

A London Rose, and Other Rhymes.

By ERNEST RHYS. Crown 8vo. \$1.50 net. (*In conjunction with Messrs. Elkin Mathews and John Lane, London.*)

A book of poetry breaking rather new ground; it takes its main impulse, however, not from London, but from Wales. Mr. Rhys is a Welshman, and he writes most naturally of Welsh themes and amid Welsh scenes. There is much in this volume that entitles him to an honorable place among the "minor" poets.

A Little Child's Wreath.

By ELIZABETH RACHEL CHAPMAN, author of "A Companion to In Memoriam." Square 16mo. \$1.25 net. (*In conjunction with Messrs. Elkin Mathews and John Lane, London.*)

The deepest and tenderest maternal emotions have found utterance in these elegiac sonnet sequences. There is no thought in this little book that the gentle memory of a child would not in all naturalness call up.

Shylock and Others.

Eight studies by G. H. RADFORD. 16mo. Cloth, gut top. \$1.50.

Mr. Radford is widely known as the author of the last, and considered by many the best, essay in the first series of "Obiter Dicta." These are pleasant essays, written by one who is not only a lover of good literature and has a thoughtful mind, but who leaves an impression of having talked with one who loves common sense and has a shrewd wit.

The Sherburne Cousins.

By AMANDA M. DOUGLAS, author of "Sherburne House" and "Lyndea Sherburne." 12mo. Cloth. \$1.50.

Miss Douglas, in her new book, continuing the story of the Sherburnes, well sustains the interest awakened in the characters of her previous volumes.

Where Honour Leads.

A Sequel to "A Question of Honour." By LYNDE PALMER, author of the Magnet Stories, etc. 16mo. \$1.25.

"A Question of Honour," published last year, was more than a well-written story. It contained elements of dramatic power and insight that promised higher possibilities in fiction. Lynde Palmer never bores her readers; her present story is interesting from beginning to end; and, having something fresh to say, she says it in a winning style.

A NEW WITCH WINNIE BOOK.

Witch Winnie at Shinnecock,

Or a King's Daughter at the Summer Art School. By E. W. CHAMPNEY. With Illustrations by J. Wells Champney. 12mo. \$1.50.

Mrs. Champney has taken her heroine in this volume to the famous Long Island art school established by Mr. Chase. It has been pronounced the most charming volume of this popular series.

A NEW ELSIE BOOK.

Elsie at the World's Fair.

By MARTHA FINLEY, author of the Elsie and Mildred books. 12mo. Cloth. \$1.25.

Miss Finley has aptly chosen for her new volume a subject of universal and timely interest, and none of the readers of the Elsie books can afford to miss the account of the heroine's experiences at the great Exposition.

First in the Field.

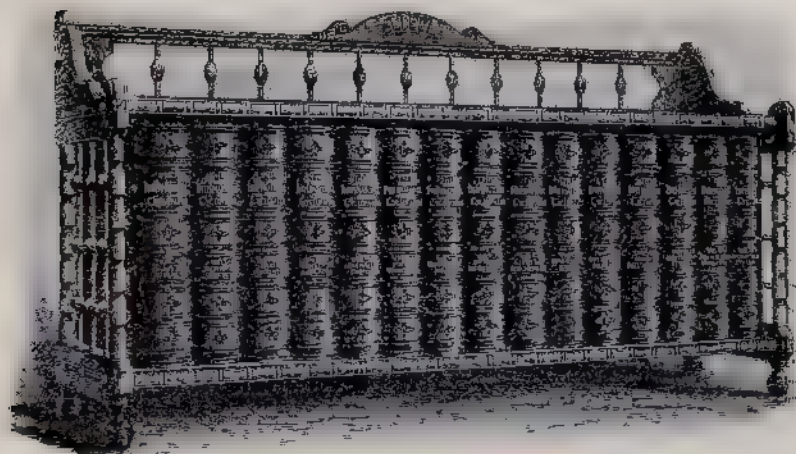

A Story of New South Wales. By GEORGE MANVILLE FENN. With illustrations. (Copyrighted.) Crown 8vo. \$1.50.

George Manville Fenn ranks with Henty as a writer of the most wholesome and engrossing stories for boys. He mingles adroitly information with incident and adventure. For the first time one of his boys' stories is issued in this country, by arrangement with the author.

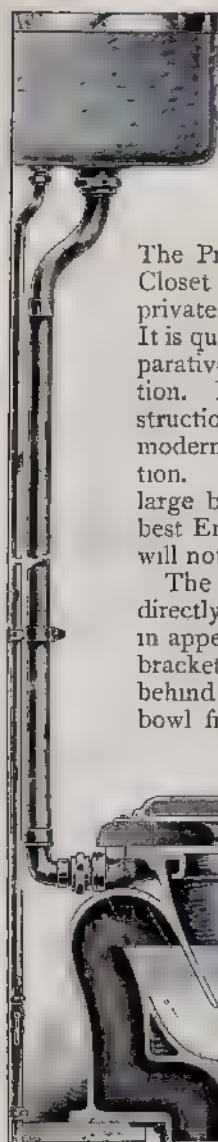

PLATE 1202-G. Reduced Cut. Copyright, 1894, by
The J. L. Mott Iron Works in their publications.

Without Doubt

The Primo Syphon-Jet Water Closet is the best for use in private dwellings and hotels. It is quick, thorough, and comparatively noiseless in operation. It represents in its construction the best and most modern principles of sanitation. The bowl contains a large body of water, is of the best English manufacture, and will not craze or discolor.

The Perfecto Seat is secured directly to the closet, is artistic in appearance, requires no wall brackets, and leaves the space behind and all parts of the bowl free for cleansing.

Dunlop Detachable Tire.

These pneumatic tires are as practicable for carriages as for bicycles. They make riding a luxury, and hundreds of them are in use by well-known carriage owners all over the United States. Send for our catalogue and prices.

THE AMERICAN DUNLOP TIRE COMPANY, 304-506 W. 14th Street, NEW-YORK.

"THE WHITMAN SADDLE CO. carried off honors at the World's Fair, Chicago, having been awarded NINE first-class medals, more than all American and European competitors together. Among the saddles which received prizes were the Whitman park, hunting, military, and the lady's "cut-back" reversible saddles. The last has only recently been invented, and is the only "reversible" lady's saddle having a "cut back," and which can be changed at short notice to either near or off side. The Whitman Saddle Co. is to be congratulated, as it led a better American as well as European exhibitors, and carried off the honors against the whole world."—*The Rider and Driver*, Oct. 14, 1893.

Our Illustrated Catalogue is mailed to CENTURY readers for three a-cent stamps; it contains a description of "the Whitman Idea" and of everything else for the rider or driver. A novel feature is the illustration of the riders and when riding, the "Whitman Ready Riding Strap," 4 cents per pair, post-paid.

SEE THE CHRISTY EDGE.

They have a peculiar wavy edge which makes them the best cutting knives ever devised. There is nothing like them, and wherever tried they are at once adopted. Make carving a pleasure. Cut new bread as thin as old, cake without crumbs and meat without shreds.

If your dealer does not keep these knives, send \$1.00 for a set containing Bread Knife, Cake Knife and Parer.

Agents make a good income steadily.

CHRISTY KNIFE CO., Fremont, Ohio. Box L.

TREES

FRUIT AND ORNAMENTAL, Shrubs, Grapes, Bulbs, Roses, Hardy Plants, For Fall Planting. Largest and choicest collections in America. **ELLWANGER & BARRY, ROCHESTER, N. Y.**

Handsome New 160-page Catalogue Free.

ROOZEN'S DUTCH BULBS for Fall, '94, and Spring, '95, PLANTING.

Hyacinths, Tulips, Narcissus, Lilies, Crocus, Ranunculus, Iris, Amaryllis, Gloxinias, Paeonies, Delphiniums, Gladioli, Dahlias, Etc., Etc., in thousands of varieties, new and old.

The flowers which, if planted indoors in the Fall, cheer the homes in the gloomy Winter months; which, if planted outdoors in the Fall, are among the first to show their exquisite beauties in the Spring.

The largest catalogue of the above, and all new and rare bulbs, is published by the famous growers, **ANT, ROOZEN & SON, OVERVEEN (near Haarlem), HOLLAND.** (Est. 1832.) All intending purchasers are respectfully invited to apply to undersigned American Agent, or to Messrs. Roozen direct, for the above catalogue, which we take pleasure in sending to such free. Prices greatly reduced.

J. TEN KUILE, General American Agent, 88 Broadway, New-York City.

Our own Book on Cultivation for 30 cents. Mention THE CENTURY.

THE SWEETEST THING ON EARTH.

Send five outside wrappers of either California Fruit or Primley's Peppin Chewing Gum and 10 cents, and we will send you BEATRICE HARRADEN'S famous book "Ships that Pass in the Night." Write for list of 1,700 free books.

J. P. PRIMLEY, Chicago, Ill.

SCHOOLS

NEW-YORK, Brooklyn, 260 Jerome Street.

HOME AND SCHOOL FOR YOUNG LADIES.

The Home and School at 260 Jerome Street, Brooklyn, was established in September, 1880, to meet the growing demand among families of culture for an institution which should combine the advantages of both the home and school life. It provides for young ladies who wish to add to other attainments a year or more of final study in the city, as well as for students who desire to pursue a thorough course of academic work. The school is fastened of the Brooklyn Heights, in a house now devoted. It has abundant sunlight, ex-half hour distant from Twenty-third Street, vorably located on one of the broad b. t for the purpose to which it is cellent ventilation, and is but one New York City.

Miss Maltby was formerly the principal of a large private day-school in the upper part of Brooklyn, and in deciding to assume charge of the present work on the Heights was influenced by somewhat urgent motives. She felt that the educational need of our time differs from that of the past, that the demand of thoughtful parents is now less for "school surroundings that produce cleverness than for those that train character, and that the question of to-day is not how much a pupil knows, but what she is becoming."

Every matter of household discipline, every detail of school routine and work, is therefore studied in its power to contribute to this end—t. at self-control, a sense of personal obligation, and a delightful existence, through some perception of its deeper meaning, may result. To prepare students for life f r the broad, earnest, responsible life that is now opening before all American girls is the end kept in view.

Special importance is attached to the home influences, and to the opportunities for social and general development which they afford. Not only are all household arrangements adapted to the maintenance of an agreeable family routine, and to the fostering of regular habits, but particular attention is also paid to the symmetrical development of individual character, and to the attainment of a liberal culture.

The leading journals and periodicals are taken, the subjects they present are discussed in daily conversation, literary and miscellaneous evenings are arranged for occasional family diversion, and the effort is constantly directed toward a healthful and natural atmosphere of interest in current events, and in life without as well as within the household.

The religious life of the family is centraly Christian, but is unsectarian in tendency. Its simple creed is "Jesus Christ," "any belief in Him—the smallest being esteemed better than any belief about Him, the greatest, or about anything else."

The easy accessibility of New-York, and the Art Collections, Public Rehearsals and Concerts of both cities, offer unusual inducements to young ladies who wish to devote their time exclusively to music or painting; the students of the house having access to studios and to private galleries of art, and visiting them under intelligent chaperonage.

MISS KATHERINE L. MALTBY, B. A., Principal.

NEW-YORK, Brooklyn, Jerome Street, between Clinton and Court Streets.

Its students have recently taken a \$600 scholarship at Yale, a \$600 fellowship at Princeton. Very desirable for young ladies. Excellent Boarding Department. This school is commanding attention; it is worth investigating. No higher moral tone in any school. Highest references given. A Private School of high rank for less than \$200 a year. Address WILLIS D. GRAVES, Principal.

WEARING APPAREL 57

WE WONDER

how many get "fooled."—
Just read this:

"It must pay you to advertise, for you make converts; or anyhow you made one of me. But I want to ask why you don't make dealers stop shoving a 'just as good' thing at me when they don't have your goods? I got fooled twice that way, but I don't any more."
THIS IS A FREE COUNTRY, and in this matter YOU hold the long end of the rope, friends!
ALL WE CAN SAY IS—

Monarch Shirts and "*Cluett*" Collars and Cuffs are
GUARANTEED GOODS.

If you want to try them, don't be "fooled" by the "just as good" offerings of larger profit paying lines. Write for our
SOUVENIR OF FASHIONS.

It is full of valuable pointers and will tell you just how to get what you want, if your outfitter is indifferent.
Copy mailed free. **CLUETT, COON & CO., MAKERS. FACTORIES, TROY, N. Y.**

BEST & CO

The Claxton Patent

Ear Cap,

For which we are sole agents for U. S., will prevent the disfigurement so often caused by the too prominent ears of infants and small children, which is also continued in after life. By wearing the above Cap, which keeps the ears close to the head instead of crumpled forward, this serious blemish is remedied. Many thousands have been used with entire satisfaction. Is no irritation to the most sensitive child.
PRICE \$1.25.

For size, send measure round head, just above ears, a so from left ear to right ear over head to bottom of other ear, NOT UNDER CHIN

We have the largest and most complete assortment of Infants' and Children's goods of every description—their outfitting is our special business.

Catalogue furnished on application.

No. 2420-20 "	28	" 30 in. "	"	6 to 6½ "	.	.	.	.	.	23.25

The Barrels are screwed in the breech, they remain perfectly round and straight and are not pinched together as it is the case in the old way of manufacture. The Lamps and the Steel Breech are one solid piece, thus avoiding Lamps becoming loose. The Barrels being independent of each other, the expansion is even, and the penetration and shooting qualities in general are thereby increased. The Steel Breech is level with the Barrels, in this it differs from the Diana Gun, where the Breech projects, and the new system is therefore called the "Modified Diana." Barrels are choked after the most approved system and are flat at the Breech.

All Royal Gun Works Guns will Open while at Full Cock.

Opera Glass Holders and Lorgnettes.

The use of this new and handsome invention gives rest to the hand and arm, and can be used with ease and comfort, avoiding the fatigue and awkwardness in which Opera Glasses are held. The holders are elegantly finished, and are a valuable and useful ornament.

The formation of this Holder is simply as follows. Place the lower bar of the Opera Glass in the slot of the Holder, so that the upright will be in the groove. Turn the screw by a strong twist of the handle to the right, and you have it securely fastened. The facing of the cups being protected with Kid, prevents the defacing of the opera glass. It is a new feature.

The Opera Glass may at convenience be tilted to the right or left, according to the hand in which it is held, thus keeping it in the horizontal position before the eyes.

Weight each, lbs., ...	11	13	16	30	26	34
Each, ...	\$3.75	4.50	5.50	7 00	9.00	12.00

The "Wonder" Freezer will freeze the finest quality of Cream in five minutes (in the four-quart size) with the proper mixture of ice and salt.

The "Wonder" is a new "up to date" Freezer with improvements never before discovered or used, and will freeze the finest quality of cream in less than half the time of any Freezer heretofore manufactured.

It is a double motion Freezer with the addition of a double scraper which constantly scrapes the frozen cream from the inside surface of the can and throws it to the center, thus thoroughly mixing the frozen cream with the unfrozen contents of the can and hastening the process of freezing the whole.

Fig No D4311

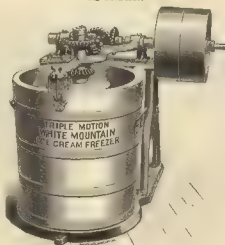

Cut showing "Wonder" Freezer, with Hinge Top, in position for removing can, or examining its contents.

The tubs are large, full-sized, affording a sufficient space between the can and the tub for the proper amount of ice to insure quick work in freezing. The tubs are strong, being bound with strong galvanized iron hoops, which are fastened so that they never can come off. In addition to this every tub is placed in a vat containing a boiling preparation which renders them absolutely water-proof.

ICE CREAM FREEZERS.

Fig No. D4212.

The platform and legs are cast iron. The gear frame extends across the top of the tub, and is held firmly in place by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is there held firmly by springs. The can and tub may be removed and replaced at pleasure while frame is in this position.

The **Duplex Dasher** is found in this Freezer the same as in our smaller ones. The beaters are malleable iron, and **tinned**. The tubs are exceedingly heavy and durable. The cans are of the heaviest tin plate we can purchase.

The pulleys are sixteen inches in diameter and five inch face, and should be run one hundred revolutions per minute

BARNES' HAND TENONING MACHINES.

Fig No D1805

Hand Tenoning Machines

No. 35 Barnes'.

EACH.
\$25.00

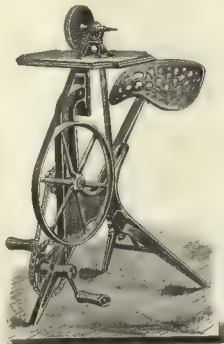

Weight 100 lbs., Bored Ready for Shipment, 110 lbs.

A. Tenon being cut. B. D. Screws to set depth of shoulder. C. C.—Handle to raise cutters from work. D. Lever to hold work in place. E.—Lever to drive the cutters forward and back. F. F.—Cutter heads. H. H. Springs to press cutter heads against work

This Machine will cut tenons of any length up to 3 in. By repeating the cut any desired length can be made. It will work on stuff of any size up to 2 x 12 in., and can be adjusted to gauge the length, thickness and shoulders of a tenon. It will not cope a shoulder, but will cut one shoulder further back than the other to accommodate stuff having a rabbeted edge.

BARNES' GRINDING AND POLISHING MACHINES.

In Ordering, give Number and Size.

We show on page 325 cuts of Mouldings made by our New Pattern Knives. These embrace forms not covered by our old set of Knives, Nos. 1 to 20. The New Knives are made on a different principle from the old ones, and can be used separately or in combination. The illustrations given do not by any means show the full extent of the work that can be done with these Knives. The possibilities of combinations are almost endless, and valuable as the Former has been heretofore, its usefulness is immensely increased by the new set of Knives, which make the Former the most valuable single machine that a cabinet maker or wood worker can employ.

The above cuts represent the elementary forms of the Knives, which, as before stated, can be used singly or in combination, as may be required. All the different shapes are made in three sizes, viz.: 1 1/8 in., 3/16 in., and 1/4 in., and it is designed that where Knives are used in combination, they shall all be of the same size. This, however, is not imperative, and the users of the Knives can combine different sizes, according to their fancy.

In ordering these Knives, give the shape of Knives required, designating same by letters as shown on cut, and also state size, whether 1/8, 3/16 or 1/4.

Where Knives are wanted for making any of the forms shown on page 325, it can be so stated in the order, and to facilitate the ordering of such Knives, we give below Knives required to make the different forms:

Form No. 24 takes Knives K-G D-G K	Form No. 39 takes Knives B-H-H-B	Form No. 52 takes Knives K-G-G-K
25 " " " E-A-K	40 " " " B-K-K-B	53 " " " K-C-K
26 " " " P-A-P	41 " " " B-H-H-B	54 " " " E-A-E
27 " " " K-G-K	42 " " " B-K-K-B	55 " " " P-E-B
28 " " " B-L-E	43 " " " B-H-C-H-B	56 " " " A-P-A
29 " " " E-A-L-G	44 " " " B-K-C-K-B	57 " " " B-D-B
30 " " " B-B	45 " " " B-H-A-H-B	58 " " " B-K-P-P
31 " " " B-A-A-B	46 " " " L-L-A-L-L	59 " " " B-K-D-H-B
32 " " " B-B	47 " " " B-L-L-B	60 " " " B-K-E-K-B
33 " " " B-C-B	48 " " " K-G-G-K	61 " " " G-D-K
34 " " " B-B	49 " " " K-E-E	62 " " " G-D-G
	50 " " " K-G-E-G-K	

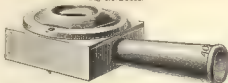

These New Knives supersede the old style Beading Knives, to which they are greatly superior in many ways. They require no head for holding them, as was the case with the old Knives, they are reversible, whereas the old Beading Knives could be run in one direction only, and they have the great advantage of being used singly for center bead or in combination for any number of beads that may be desired.

18 in. Diameter, Weight,
75 lbs., **\$27.00**

No. 6—Closed Hood, Height,
33 in., **Hearth, 18 in.**
Diameter, Weight, 80
lbs., **\$30.00**

Nos. 5, 4 and 6 will produce a welding heat on iron $1\frac{1}{2}$ in. in diameter in 5 minutes.

No. 3 Without Hood,
Height, 29 in., Fan, 10
in., **Hearth, 21 x 27**
in., Weight, 140 lbs., **\$36.00**

No. 3 will produce a welding heat on iron $2\frac{1}{2}$ inches in diameter in 5 minutes

No. 1—Half Open Hood,
Height, 29 in., Fan, 10
in., **Hearth, 21 x 27**
in., Weight, 140 lbs., **\$40.00**

No. 1 will produce a welding heat on iron $2\frac{1}{2}$ inches in diameter in 5 minutes

No. 0—Open Hood, Height, 30
in., Fan, 14 in., **Hearth,**
28 x 40 in. Weight,
250 lbs., **\$50.00**

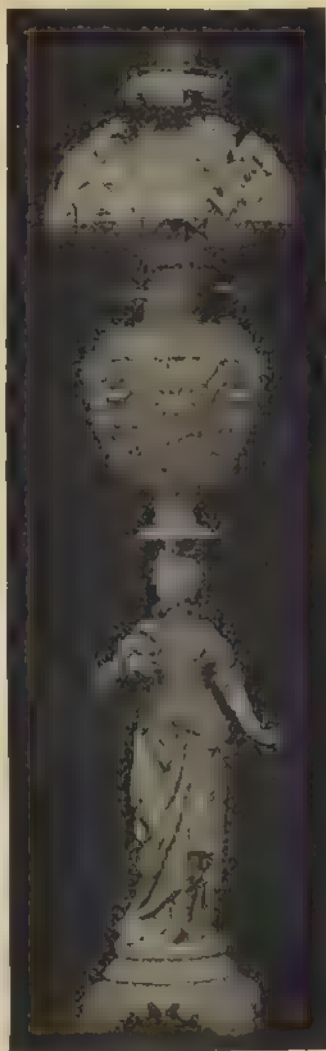

No. 0 is especially adapted for heavy blacksmiths' work, having a large fire place, with sufficient blast to do the heaviest kind of work; will heat $3\frac{1}{2}$ to 4 in. round iron in 10 minutes.

Power Horse Clipping Machines.

AMERICAN SHEARER MAN'G CO'S

Fig. 345

With Drop Rod

New No. 3 Power Horse Clipping Machine with Drop Rod, Complete with No. 1 Vibrating or No. 2 Rotary Handle. - each, \$80.00

In the construction of this machine special attention has been given to strength and durability, combined with the elimination of all unnecessary weight.

In practical tests it has more than sustained the expectations of the designer, and for a light-running, durable machine it has no equal.

It may be used with the smooth Rotary or Vibrating Handle, as shown on page 1249, for Drop Rod Machines.

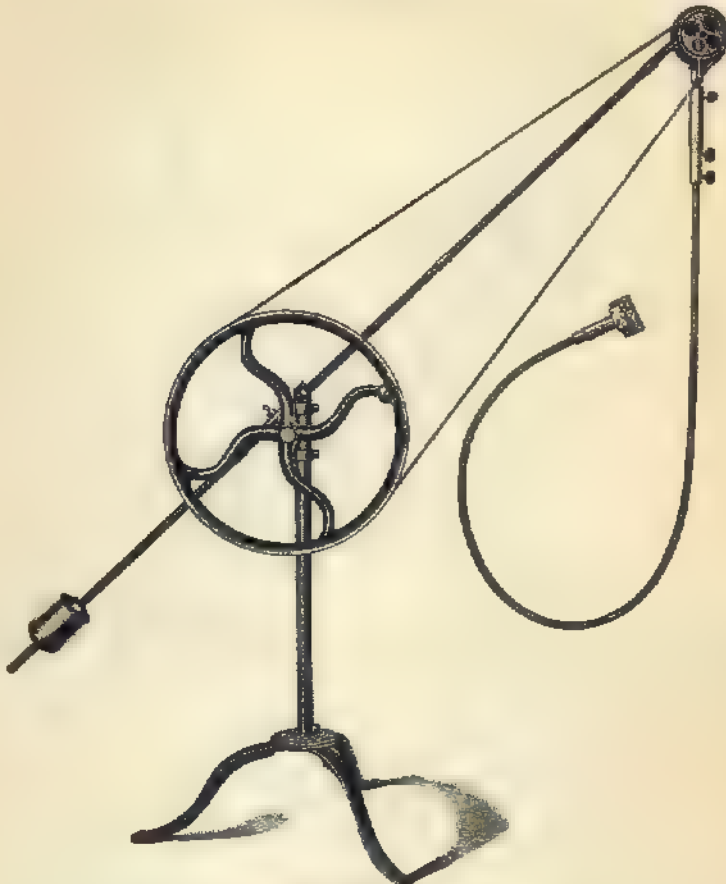

Full instructions for setting up and operating accompany each machine. Weight of Machine, boxed, ready for shipment, 85 pounds.

In ordering, state kind of Handle wanted.

S. F. MYERS & CO., New York,

SOLE AGENTS FOR THE SALE OF THE

CELEBRATED PRENTISS CALENDAR and TIME COMPANY'S CLOCKS,

CONTROLLING THE ENTIRE STOCK AND OUTPUT OF THE SAME.

AN ABSOLUTELY ESSENTIAL FEATURE IN EVERY BUSINESS PLACE.

THIS PEERLESS CLOCK

has been in constant use for years by thousands of leading New York and Chicago houses.

We having purchased the entire stock on hand, and controlling the output of the unfinished portion, now offer them to the trade for sale outside of the City of New York, and at a price less than one-half of the former figures.

Heretofore the use of the same has been allowed under annual leases at a rental of \$9.00 per year. They are absolutely the best thing of the kind ever introduced, and dealers would study their own interests by procuring privileges from us to control the same in their immediate vicinity.

We have a circular with the names of over 2,000 prominent firms and corporations, who are and have been using these clocks for years, including such prominent concerns as those below, which we will forward on application.

The American Waltham Watch Co.
Brooklyn Watch Case Co.
New York Stock Exchange.
New York Board of Health.
Edison General Elec. Light Co.
Equitable Life Assurance Co.
N. Y. Life Ins. Co.
Continental Nat'l Bank.
Importers & Traders Nat'l Bank.

B. Altman & Co.
Austin Nichols & Co.
Lyons, Chaute & Beaman.
Townsend, Wyatt & Einstein.
Postal Tel. Co., etc., etc.

AS A TIME-KEEPER

it has a Straight Line Movement unsurpassed for accurate and reliable time, and is the only 60-Day Clock in the market. It is finely adjusted, and has an Absolutely Noiseless Motion.

THE CALENDAR

is substantially made, easily arranged with a little care, and it shows the Day, the Month, and the Date conspicuously in type large enough for the ordinary eye to read readily some thirty or forty feet distant. It is automatic, and runs 12 Months with one winding, and is the new official calendar of the Electric Time Company (Western Union Telegraph Co.), who pay a heavy royalty for its use.

THE WESTERN UNION ELECTRIC CLOCKS with same Calendar are Rented—Not Sold.

THE PRENTISS Calendar and Time Clock.

is an indispensable feature when accurate date and time are wanted. They have not been introduced generally outside of New York and Chicago.

THE PRENTISS CLOCK.

Height, 3 feet. Dial, 10 inches. Date Figures, 2 inches high, 3 1/2 inches wide.

IN WALNUT, NATURAL OAK, ANTIQUE OAK AND MAHOGANY CASES.

GYMNASIUM GOODS.

SIMMONS

Fig. No. D7779.

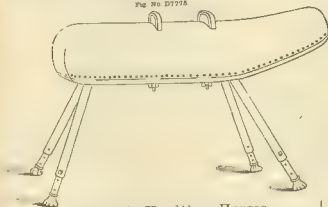

Spalding's Special Vaulting Horses.

While it has four legs, the same as most vaulting horses, it is so constructed that the legs are put in a vertical position instead of slanting, giving a clear "door way" in advantage that all experts on this apparatus will recognize at once. The old style of adjustment is superseded by a well known mechanical device under a new application. By this device the horse can be raised or lowered by simply turning the crank, and it firm and solid in any position. By raising the legs to the end of the base to a vertical position the horse is thrown on rollers, making it an easy matter for one person to move it. The entire work in the head of leather well padded regulation size.

EACH.
\$120.00

No. 0.—With or without Neck,

Fig. No. D7775

Spalding's Vaulting Horses.

Covered with best quality dressed Cowhide, well padded, telescopic pommels, telescope legs, adjustable from 3/4 to 5/4 feet.

No. 1—Complete, EACH. \$50.00

Fig. No. D7777

Spalding's Spring Boards.

No. 22—7 feet long, 2 1/2 feet wide, Extra Well Made and Heavy, EACH. \$40.00

Incline Boards.

No. 27—For Use with Traveling Rings, EACH. \$12.00
No. 28 " " " Rubber Covered, 16.00
Hardwood, 16.00

Made of the best Hickory, with Hardwood Pommels, and are firmly held to the floor by a Turn Buckle at each end. Turn Buckles and Pommels furnished with each Spring Board, but, if desired, can be used without fastening to the floor.

Fig. No. D7776

Spalding's Vaulting Bucks No. 1B.

Covered with best quality dressed Cowhide, well padded, telescopic legs, adjustable, from 3/4 to 5/4 feet.

No. 1B Complete, EACH. \$30.00

Fig. No. D7778

No. 29—Used as a Batteau Board.

The Fittings in the rear are raised to a vertical position and sustained in position by set screws, and the center bar then moved to opposite end.

No. 29 Spalding's Combined Batteau and Barring Boards, for Heavy Work in Gymnasium, EACH. \$40.00

Requires no fastenings and is easily moved about. The rubber bar must be stretched, and by placing it forward, the action can be adjusted to suit the person using it. The frame is made of 1 1/2 inch iron pipe, the corners tipped in the rubber, and the board proper of best selected hickory.

No. 1—With 5 foot Ropes, \$3.00
 No. 2— " 6 " 3.25
 No. 3— " 7 " 3.50
 No. 4— " 8 " 3.75
 Leather Covered extra, 2.00

Made of galvanized iron 8 inches in diameter, outside measurement.

Fig. No D7786.

Fig. No D7787

Chest and Inclined Bars.

Chest Bars.

EACH

No. 103—Single Set of Bars (2), Upright, 12 feet or less, Complete with Base and Cap Boards, \$12.00
 No. 104—Double Set of Bars (4), 12 feet or less, Complete, with Base and Cap Boards, 24.00
 No. 105 Triple Set of Bars (6), 12 feet or less, Complete, with Base and Cap Boards, 36.00

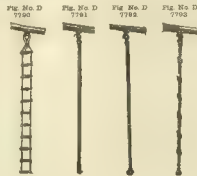

Inclined Bars.

PER PAIR.

No. 107—12 feet or less, Complete, with Base and Cap Boards, \$15.00

For Wall Braced Bars add \$3.00 to each of the above numbered Bars, to pay for Side Gays.

Where ceilings are higher than 12 feet, we would suggest ordering Wall Braced Bars, unless you want them for the dual service of Chest Bars and Double Climbing Poles. In that case 16 foot ones would be the best. If the ceiling will permit.

No. 93. No. 96. No. 97. No. 99.

Climbing Apparatus.

PER DOZEN. \$10.00

One-half Dozen in a Box.

SCHOTT BROS. BUTTON MAKING MACHINE.

IMPROVED.

PRICE \$7.50 EACH, NET CASH.

Every retail dry goods house should be supplied with the above machine

A machine by which a merchant can at once have first class buttons made (of any size) out of same material as costume, cloak, coat or jacket is made. No bother matching shades

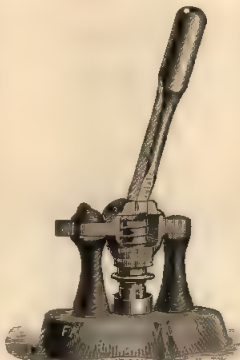

It is in use now by all the leading dry goods establishments of the United States.

It is simple in mechanism; unequaled in every way; best and cheapest machine made for the purpose; gives entire satisfaction, and has come to stay.

It cuts the cloth blanks, and makes all the leading sizes of buttons on one and the same machine. Directions for using with every machine

The moulds, whose cost is very small, are the same as those used on the finest brand buttons

What better match can there be, than a button made of the same material?

One-fourth size cut, weight $6\frac{1}{4}$ lbs., machine complete to make three sizes, either 22 or 24 line, please state which, also 30 and 36 line; Moulds charged extra. 18 line 25c., 5 gross in box; 22 line 30c., 24 line 30c., 30 line 40c., 36 line 50c., 1 gross in box

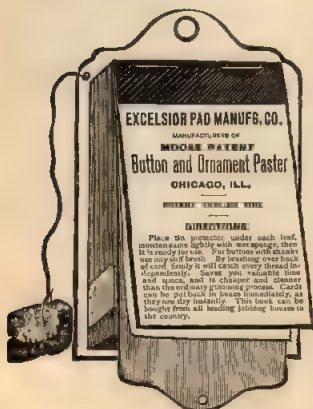

Sets of tools to make 18 line buttons, \$1 50, net cash, extra.

Directions for the use of Schott Brothers Button Machine.

In making buttons of this material use a size larger cutter, that is use coat size cutter to make a vest size button, use two thicknesses of material. We find that canvas such as tailors' use for stiffening coats answers admirably for the inside material

There is no larger cutter than the thirty-six line that goes with the machine, but find that in the larger buttons the mould covers nicely with the same size cutter. We also have a sixty line cutter and tools for Directoire buttons, used for trimming the skirts of dresses in place of woods moulds—which come extra—\$1 00 for cutter; \$2 00 for die, moulds \$1 00 per gross, net cash

EXCELSIOR BUTTON PASTER.

EXCELSIOR PAD MANUFACTG. CO.

MANUFACTURED BY

MOORE PATENT

Button and Ornament Paster

CHICAGO, ILL.

REGISTERED TRADE MARK

DIRECTIONS:

Place the paster, under each leaf, between pairs, lightly with the paster, press it to ready for use. For buttons with shanks use any of these. For buttons with shanks of card family it will catch every thread in. Vigorously. Save you valuable time and space, and is cheaper and cleaner than the ordinary pressing process. Cards can be put back in boxes immediately, as they are dry instantly. This tool can be bought from all leading jobbing houses in this country.

Button pasters, 1,000 in box per 1,000, \$2 00

Terms, 1 per cent. ten days.

These Levels are made of the best quality of Gray Iron, with Steel Bars running through each column from one parallel to the other, giving the instruments a light and tasteful appearance, also adding greatly to their strength. There is no liability of the instrument getting out of order by any fair usage. They are practically arranged for the use of Carpenters as well as Machinists, and are warranted to be correct in every particular.

All above Levels, One in a Box.

TACKLE BLOCKS.

Sure Grip, Steel, Japanned.

Fig. No D4882

	EACH.
No. 3 --To be used with $\frac{1}{2}$ in. Rope; one man can lift 250 lbs., Capacity 400 lbs.,	\$3.00
No. 4 --To be used with $\frac{1}{2}$ in. Rope; one man can lift 350 lbs., Capacity 730 lbs.,	5 50
No. 5 --To be used with $\frac{1}{2}$ in. Rope; one man can lift 350 lbs., Capacity 1500 lbs.,	7.00
No. 6 To be used with $\frac{1}{2}$ in. Rope; one man can lift 400 lbs., Capacity 2000 lbs.,	9 50
No. 6 $\frac{1}{2}$ --To be used with $\frac{1}{2}$ in. Rope; one man can lift 600 lbs., Capacity 3500 lbs.,	14.00

The Rope is not included in the above prices. When ordering, if Rope is wanted specify the exact distance between the lowest starting point and the Hook the Machine is suspended from.

Will hold load at any point without backward slip, thus enabling a man to hoist with half the usual amount of exertion. The wedge-shaped brake has a double grip, and is absolutely automatic and very positive. Its efficiency is as great, proportionately, for raising heavy as light loads. Is susceptible of being disengaged by very slight pressure. Is quick lifting, quick lowering and light.

Davis', Pocket, Iron.

No. 17—3½ in. Long, for Square or Straight Edge, ... **PER DOZEN.**
 One Dozen in a Box. \$3.00

FIG. No. D684

Bit and Square.

No. 44—Brass Frame, ... **PER DOZEN.**
 \$3.80

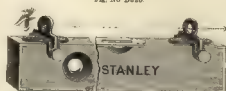

A thumb screw secures the Level to the Bit, and boring can be done with perfect accuracy as to perpendicular, horizontal, or angle of forty-five degrees, by observing the bubble-glass while turning the Bit.

The Frame can also be attached to a Carpenters' Square. Two shoulders rest on the top of the horizontal leg of the square, thus making it an accurate Spirit-Level; and the upright leg of the square will then indicate an exact Plumb-Line.

One-twelfth Dozen in a Box.

LEVEL SIGHTS.

FIG. No. D685.

Cut showing Level Sight and mode of attachment.

No. 1 Stanley's, Adjustable Level Sights, ... **PER DOZEN PAIRS.**
 \$9.00

An ingenious and convenient device, which can be attached to any Level as an accurate means for leveling from one given point to another at a long distance away

Packed Fifty 1 lb. Canisters; Eight 6½ lb. Kegs; Four 25 lb. Kegs in a Case.

Sizes and Grades.

No. C—Is intended for large bore guns; makes an excellent pattern and has good penetration in 10 gauge guns.

No. D—Is specially adapted to field shooting in both 10 and 12 gauge guns.

No. E The quickest Wood Powder made Will produce excellent results in 16 and smaller gauges **Must not be used in any gauge larger than 12.**

Trap For 10 and 12 gauge guns as designated by the numbers. This grade is designated for trap purposes and for parties wishing a quick hard shooting Powder.

Rifle—Made in three sizes of grains, 1, 2 and 3. No. 1 is suitable for Rifles of 32 caliber and smaller No. 2, suitable for Rifles from 32 to 44 caliber. No. 3, for Rifles 44 caliber and larger.

Note as to Weight.

Nitro Powder is lighter than Black. By a 6½ lb Keg is meant a keg containing an equal amount in bulk as 6½ lbs. Black Powder, etc.; that is, it contains as many loads.

Nitro Powder can be Shipped by Express or Freight and can be Packed with Other Goods.

Comparative Table of Nitro Powders.

WALSRODE POWDER.

1 lb. Canisters, (Containing 120 Standard Charges for 12 Gauge Guns), ...
10 lb. Drums, (" " 1200 " " " 12 " " "), ...

EACH.
\$0.85
8.50

The Standard Load for 12 Gauge is 29 Grains.	
" Maximum " 12 " " 31 " "	
" Standard " 10 " " 25 " "	
" Maximum " 10 " " 33 " "	
" Standard " 16 " " 25 " "	

These Loads must not be increased, as to do so would likely burst the Gun.

CAUTION. Walsrode Powder compares with the bulk or measure of Black Powder as follows: One-third the quantity of Walsrode will produce the same pattern and penetration, and at the same time the same bursting force as the three times larger quantity of Black Powder by measure.

It is therefore absolutely necessary that each load be weighed on a fine scale or measured with a special Walsrode measure.

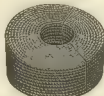

NOTE: Nitro Powder is lighter than Black Powder; packages contain the same in bulk as similar packages of Black Powder. It is sold by bulk, not by weight.

Nitro Powder can be Shipped by Express or Freight and can be Packed with Other Goods.

Fig No D7938

Used in Connection with Blasting Machines and Electrical Exploders.

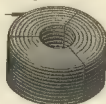

Leading Wire, in Coils of 500 feet, PER POUND. \$0.60

Average Weight per Coil, 6 1/2 lbs.

Enough Leading Wire is needed with each machine to make two Leaders of sufficient length to reach from the blast to a safe distance for the person to stand who shall operate the machine. (Say 300 feet.)

Connecting Wire.

Fig No D7937

PER POUND.

Connecting Wire, in 1 lb. Coils, containing about 250 feet, \$0.80

A pure Copper Insulated Wire used for connecting the exploders where several charges are to be fired simultaneously.

Miners' Squibs.

PER 1000.

Powell's Safety Miners' Squibs, \$1.50

100 in a Box. 10,000 in a Case.

Squib Cases.

PER DOZEN

No. 10—Tin, Size 8 x 1 1/4 x 7/8 in., Hold 100 Squibs, \$2.80

One Dozen in a Box.

Blasting Paper.

PER POUND

Best Waterproof Manila, \$0.10

Put up in 9 and 12 inch Rolls. Average Weight per Roll, 6 lbs.

Anton's Patent Miners' Lamp Wicks.

Made from Superior Cotton, free from knots, evenly twisted and made to exactly fit the Lamp.

PER DOZEN BOXES.

No. 2—Anton's Miners' Lamp Wicks, \$1.20

One Dozen Wicks in a Box. Six Dozen Boxes in a Case.

For Miners' Tools, see Page 42.

For Miners' Lamps, see Page 1034.

Blasting Machines.

Fig No D7928

Used for Exploding Dynamite by Electricity in Connection with Electrical Exploders.

A Magneto-Electric Instrument, constructed on the Wheatstone and Siemen's principle, having a magnet of horse shoe character, wound with coils of insulated copper wire. Capacity 10 to 20 holes. Weight about 22 lbs.

No. 3—Blasting Machines, EACH. \$35.00

Safety Fuse.

Fig No D7929

PER 1000 FEET.

Hemp, Barrel contains	12,000 feet and weighs	130 lbs., \$ 5.60
Cotton, Case	10,000 "	125 " 6.00
Single Tape, Case	6,000 "	125 " 9.50

PER POUND.
\$0.32
30
28
26
24
22

Packed in Cases Containing 25 and 50 lbs.

We do not Break Cases.

The Standard Size of Cartridge is $1\frac{1}{2}$ x 8 in. We can furnish any Size or Length desired.

Gelatin Powder.

Gelatin, a Fumeless Dynamite, for use in Tunneling, specially adapted for use under water. Made in the same Grades of Strength as Ordinary Dynamite. Prices on application.

Judson Powder.

A Granulated Powder, Black in Color, used in place of Ordinary Blasting Powder, where more Explosive Force is Required.

Judson Powder, "R. R. P".

PER POUND.
\$0.18

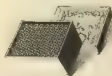

Put up 12 $\frac{1}{2}$ lbs. in a Bag. Four Bags in a Case.

We do not Break Cases.

Write for Prices in Car Load Lots. Dynamite can only be shipped by Freight. Blasting Caps cannot be shipped with Dynamite.

NOTE: On account of a State Law, we cannot sell Dynamite to parties in Missouri without first obtaining from the Purchaser an Affidavit that it will not be used for Unlawful Purposes. Blanks furnished on application. Pamphlets containing Full Instructions for the Use of High Explosives furnished on application.

FIG No D7884

Blasting Caps for Dynamite.

Superior Quality.

	PER 1000.
Triple Force, 540 Grammes Fulminate to the M,	\$ 9.00.
Quadruple " 650 " " " " " "	11.00.
Quintuple " 800 " " " " " "	13.00.

Packed 100 in a Metal Box. 25,000 in a Case.

Write for Quantity Prices.

Blasting Caps cannot be shipped with Dynamite.

FIG No D7925

To be used for Exploding Dynamite with an Electric Battery.

Only the Best Material used in the Manufacture of these Exploders.

Electrical Exploders.

Double Wound Insulation, Quintuple Strength Caps, Cotton Covered Wires. Every Exploder Warranted Perfect.

	PER 100.

Explanation of Lightning Dies.

Fig. No. D1845

The cut shows a Die and Guide taken apart to show the mechanism. The cup-headed screw on the right holds the halves together as a pivot, while the size is regulated by the wedge-shaped screws on the left, the die being clamped in the elastic stock.

Fig. No. D1847

The Machine Dies differ from those used in the Lightning Plates only in being made to cut from face instead of from under side. This cut shows a Machine Die in Holder, for use in Lathe Chucks or Bolt Cutters.

Fig. No. D1848

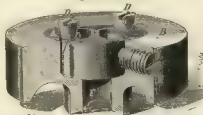

The taper head screws govern the size of the cut. The points of these screws hold in rim at bottom of socket. The straight screws close dies together from the sides, and hold the portions firmly in place.

Extra Screws, for Lightning Dies,

EACH
\$0.05

Fig. No. D1849

A, die. B, collet. C, taper screws regulating the cut. E, binding screws. F, guide for bolts. Another binding screw, not shown in cut, opposes screw E on other side. In adjusting the die, the binding screws E are first slackened, and the size required fixed by moving the taper-headed screws D in or out, after which the binding screws E are set very tight the last thing.

MEN'S NECKWEAR.

We lead in Fine Men's Neckwear and have on hand at all times a full line of the latest styles and choicest patterns suitable for all occasions.

The Stanley Adjustable Planes.

Miller's Patent Combined Plow and Match-
ing Plane.

Fig. 409.

The above engraving represents the tool adjusted for use as a Plow. With each Plow eight Bits ($\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$ and $\frac{1}{8}$) are furnished, also a Slitting-tool and a Tonguing tool $\frac{1}{2}$ inch) are furnished, and by use of the latter, together with the $\frac{1}{2}$ inch Plow Bit for grooving, a perfect Matching Plane is made.

No. 43, Iron Stock and Fence, each, \$ 7 00
44, Gun Metal Stock and Fence, " 10 00

Traut's Patent Adjustable Dado, Filletster,
Plow, Etc.,

Fig. 410.

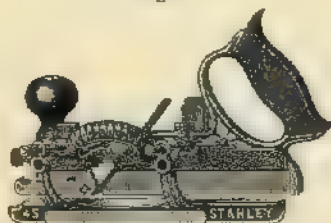

By attaching the Guard plate, shown above, to the sliding section, the tool may be readily converted into a Plow, Filletster or a Matching Plane. The tool is accompanied by eight Plow Bits ($\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$ and $\frac{1}{8}$), a Filletster Cutter, a Slitting-tool and a Tonguing tool.

No. 46, Iron Stock and Fence, each, \$7 00

No. 47, Adj. Dado, Iron Stock and Fence, including Bits $\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ and $\frac{1}{2}$ inch and Slitting-tool, each, \$8 00

TRAUT'S PATENT ADJUSTABLE BEADING, RABBIT AND SLITTING

Fig. 411.

Each Plane is accompanied by seven Beading Tools ($\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ and $\frac{1}{8}$ inch) nine Plow and Dado Bits ($\frac{1}{8}$, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{2}$ and $\frac{1}{8}$ inch.) A Slitting-tool and a Tonguing-tool.

No. 48, Iron Stock and Fence, each, \$8 00

Adjustable Planes.

BULL-NOSE PLOW, FILLETSTER AND MATCHING PLANE.

Fig. 414.

Two interchangeable front parts go with this Tool. The form shown above is that of a Bull-Nose Plow, and the Cutter will easily work up to an angle of 100°, and any angle as a Base fitting Stairwork, etc. With the other front part it takes the ordinary form of a Plow, and is adapted for regular uses.

With each Tool, eight Plow Bits, $\frac{1}{8}$, $\frac{1}{16}$, $\frac{1}{32}$, $\frac{1}{64}$, and $\frac{1}{128}$ inch; a Filletster Cutter and a Shifting Blade are furnished; also a Tonguing-tool ($\frac{1}{8}$ inch).

No. 141, Bull-Nose Plow, Filletster and Matching Plane, Iron Stock and Fence, each, \$7.00

No. 57—Barnes', with Foot Treadle, including 3 Centers, 2 Tool Rests and Socket, Weight, 230 lbs.,	\$35.00

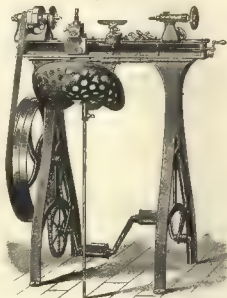

Boxed ready for shipment, Weight, 330 lbs.

No. 57 Lathe is designed for Wood Turning; it will take in stuff 12 inches in diameter and 3 feet long; the Speed can be varied from 1,000 to 2,000 revolutions per minute, the Lathe is made entirely of Iron and Steel, except the Bed, which is of Wood; the Spindle is of Steel, fitted up in the best manner; all the Bearings are of Steel, making them strong, durable and light running; the Centers are accurately fitted to Taper Holes; no Wrench is required to adjust the Tail Stock or Tool Rests and Sockets, Hand Wheels being used instead.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

LATHES.

Fig No D1721

Barnes', with Velocipede Foot Power.

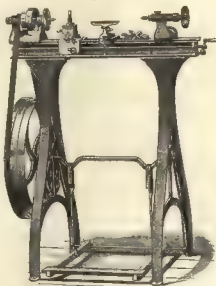

No. 93 - Velocipede, including 1 Turned Face Plate, 2 Pointed and 1 Spur Centers, 2 Rests with Socket and Plate for Hand Tools, Slide Rest, Wrench and Belting, Weight, 210 lbs., **\$40.00**
Boxed, Ready for Shipment, Weight, 265 lbs.

No. 93 Lathe is designed for turning both Wood and Iron, and for boring, drilling, polishing, etc. It is not an amateur tool, but is strictly mechanical in every respect. It will take in work 7 inches in diameter and 20 in. long. The speed can be varied from 1,000 to 2,000 revolutions per minute, and the motion can be started, stopped, or reversed instantly, at the will of the operator. The Lathe is made entirely of Iron and Steel. The bed is solid, and has V-shaped projections, over which the head and tail stocks and hand and slide rests are fitted. The leading screw for the tool carriage is operated by hand; by it the tool carriage can be traveled 30 in., the entire distance between the centers. The carriage can be engaged or disengaged instantly from the leading screw.

The upper or cross slide ways on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes bored to the extent of its travel on these ways. The arrangement of the tool post and carriage is such that balls can be turned. The tail stock can be moved and set at any point desired, by the simple turning of a hand wheel; or it can be taken off entirely, thus leaving the bed free for face-plate or chuck work. The head stock spindle has taper bearings, and can be adjusted with as much delicacy as a jeweler's lathe; that of the tail stock is moved by a screw and hand wheel. The head and tail stock spindles are made of steel, and have truly fitted taper centers, and that of the tail stock is self-discharging.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

Fig No D1722

Barnes', with Treadle Foot Power.

No. 95 - Treadle, including 1 Turned Face Plate, 2 Pointed and 1 Spur Centers, 2 Rests, with Sockets and Plate for Hand Tools, Slide Rest or Tool Carriage as described, and Wrench and necessary Belting, Weight, 150 lbs., **\$40.00**
Boxed, Ready for Shipment, Weight, 235 lbs.

The leading screw for the tool carriage is operated by hand; by it the tool carriage can be traveled 30 inches, the entire distance between the centers. The carriage can be engaged or disengaged instantly from the leading screw. The upper or cross slide ways on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes bored to the extent of its travel on these ways. The arrangement of the tool post and carriage is such that balls can be turned.

It will take in work 7 inches in diameter and 20 inches long. The speed can be varied from 1,000 to 2,000 revolutions per minute.

The tail stock can be moved and set at any point desired, by the simple turning of a hand-wheel, or it can be taken off entirely, thus leaving the bed free for face plate or chuck work. The head stock spindle has taper bearings, and can be adjusted with as much delicacy as a jeweler's lathe; that of the tail stock is moved by a screw and hand wheel. The head and tail stock spindles are made of steel, and have truly fitted taper centers, and that of the tail stock is self-discharging.

No. 97 Velocipede, 25 in. between Centers, Weight, 270 lbs., (Boxed for Shipment, Weight, 340 lbs.,)	\$70.00
No. 99 -With Countershaft, without Foot Power,	70.00
No. 101-Velocipede, Foot Power and Countershaft,	85.00
No. 111-Hand Rest for above,	2 50

Is a back-geared screw-cutting Lathe. It feeds right or left, and cuts screws right or left without change of gearing. The carriage is adjustable for taper boring or ball turning. It is thoroughly gibbed for taking up wear.

The tail stock has side movement to adjust centers for turning tapers. The head stock has hollow spindle for rods up to $\frac{1}{2}$ in. All the gearing is cut from solid metal. All parts are made of steel where this would best serve the purpose.

It will cut all ordinary threads from 5 to 48, and miscellaneous threads up to 154. It swings 9 in. on face plate and $1\frac{1}{2}$ in. over tool carriage.

The small pulley on cone is $2\frac{1}{2}$ in., the large pulley $4\frac{1}{2}$ in. It has three speeds, and is suitably arranged for heavy or light work in turning or polishing.

Pat No D1725

Barnes', with Velocipede Foot Power.

No. 113—Velocipede, 34 in. between Centers,	EACH.
Weight, 385 lbs. (Boxed for Shipment, Weight, 490 lbs.),	\$100.00
No. 115—Velocipede, 40 in. between Centers,	
Weight, 420 lbs. (Boxed for Shipment, Weight, 515 lbs.),	105.00
No. 120—Fixtures to raise the Head and Tail Stocks, and Tool to bore out and swing 17 inches in diameter,	EXTRA.
	\$10.00
No. 131—Two Rests, with Sockets, for Hand Turning,	3.00
No. 133—Countershaft, only for above,	15.00

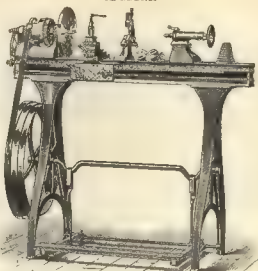

The Lathe swings 11 inches on the face plate, and 6 1/2 inches over the tool carriage. With its back-gearing and cone pulleys the Lathe has a great range of speed.

The head stock has a steel spindle with 1/2 inch hole through its entire length. The tail stock can be readily set at any desired point, or taken altogether from the lathe bed, thus leaving it free for face plate or chuck work. It can also be set over for turning tapers. The spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers, and the tail stock center is self-discharging. The tool can be set to work at any position or angle desired; also to bore a taper hole or turn a ball, features not ordinarily in the movements of tool carriages. All the works are securely protected from chips and dirt, thus insuring long wear and durability to the most costly and vital parts of the lathe. The gearing furnished can be combined to make different leads of thread from 4 to 40, besides many others not mentioned on the index plate. As a right or left screw-cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearings to be.

BED—EXTRA LENGTH. The Nos. 113 and 115 Velocipede Lathes with their present dimensions, are in true proportion. Gunsmiths and others often require a greater length of bed, and do not care for proportionate strength in other parts. For such we can furnish a bed that will admit of 40 inches between centers.

When it is possible to do so, Chucks should be Fitted to Lathes before being Shipped.

No. 163—Two Rests, with Sockets, for Hand Turning,

3 50

Nos. 135 to 149 Lathes are designed to do as large work as it is practical to do by foot power. They are strong, substantial Lathes for a job or manufacturing shop where the demand on a Lathe is from the smallest to the largest work.

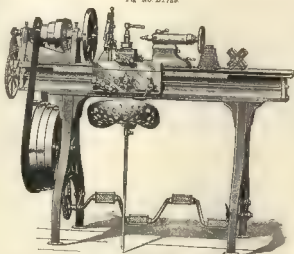

They have our patent twin screw feed and screw cutting combination, which makes change of feed in the tool carriage instead of in the head stock. This greatly simplifies and reduces the number of parts commonly used for these purposes.

The tail stock has side movement to adjust centers for turning tapers. The head stock has hollow spindle for rods up to 10 inch. All the gearing is cut from solid metal. All parts are made of steel, where this would best serve the purpose. They will cut all ordinary threads from 4 to 40, and miscellaneous threads up to 154.

When it is possible to do so, Chucks should be Fitted to the Lathes before being Shipped.

TINNERS' RULES AND STRAIGHT EDGES.

Fig. No. D8194

Cut showing the first 3 Tables on face of one side of the Rule.

Cut showing 1 in. of the length of the Rule.

Full Size.

Tinners' Steel Rules and Straight Edges, 3 feet in Length, 1½ in. Wide, ¼ in. Thick,

{ Plain Polished, ... EACH. \$7.50
Nickel Plated, ... 8.00

Is laid off on one side with two rows of figures. The first row is laid off like an ordinary steel square, by eighths and inches, up to 3 feet. The second row is a line of circumference, divided into 112 equal parts; each of these divisions is again subdivided into 8 equal parts, the large divisions representing an inch to a scale, and the subdivisions an eighth inch. Therefore, against any diameter we can find circumference in this line to a scale of inches and eighths of inches.

The reverse side of the Rule gives the dimensions of measures and cans. The first two tables are for flaring measures. 1st, Liquid measures, from 1 to 6 gallons; 2d, Dry measures, from 1 peck to 2 bushels, giving diameter of top and bottom, and height of each size and kind.

The third table is for cans with pitch or cone tops, from 1 to 10 gallons, giving diameter of top and body, and compass mark for striking breast.

The fourth table is for flat top cans, from 100 to 200 gallons (31 different sizes), giving height and diameter.

The fifth table is for dry measure, from 1 quart to 3 bushels, giving height and diameter.

Length, in.,	36
Depth, in.,	24
Height, in.,	60
Weight, lbs.,	300
Each=	\$34.00

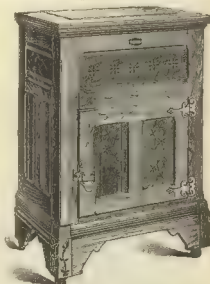

This style is designed for use in apartment houses where room is valuable, and a Refrigerator is required taking as small a floor space as possible. These numbers are made for this purpose and are larger in height than the ordinary styles.

This style differs from Nos. 100, 101 and 102 only in having the Provision Chamber provided with two doors, and in being made larger in size.

SIBERIA REFRIGERATORS. IMPROVED.

Antique Oak Finish, Handsomely Carved, Polished Brass Trimmings, Solid Metal Sides,
Triple Walled, Charcoal Filled, Elegant in Finish.

Fig. No. D4220

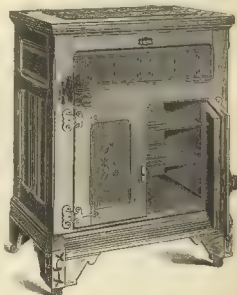

Single Doors.

Nos.,	000	00	0	1	2
Size of Ice Chamber, in.,	13x9½x8½	14x11x9	15x12x10	18x14x10½	22x14x12
Length, in.,	24	25	26	29	33

Height, in.,	47½	49
Weight, lbs.,	230	230
Each—	\$25.00	28.00

These are very desirable styles and sizes, having sufficient capacity to meet the requirements of a majority of small families.

Cut showing Styles Nos. 3 and 4.
Double Doors.

SIBERIA REFRIGERATORS.

IMPROVED.

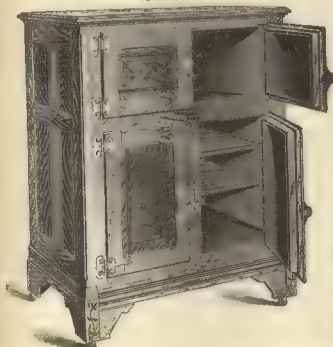

Antique Oak Finish, Handsomely Carved, Polished Brass Trimmings, Solid Metal Shelves, Triple Walled, Charcoal Filled, Elegant in Finish.

Fig No D4227

Cut showing Style No. 10.

Fig No D4226

Cut showing Style No. 07.

Two Provision Chambers.

No.,	07
Size of Ice Chamber, in .	35 x 21 x 10 1/2
Length, in.,	46
Depth, in.,	28
Height, in.,	57 1/2
Weight, lbs.,	400
Each =	\$42.00

This style is designed for parties requiring a large size, such as Boarding Houses, Hotels, etc., etc. It has a very large Ice Chamber, easy of access, two large Provision Chambers, and is in every way adapted to a large class of customers requiring a first-class article. The Ice Chamber in this style being large, makes it very convenient for storing many articles for cooling purposes. The Provision Chambers are always dry, pure and sweet, if properly cared for.

Grocers' Refrigerator, for Grocers, Hotels, Boarding Houses, Etc.

No.,	10
Size of Ice Chamber, in.,	39 x 25 x 16
Length, in.,	50
Depth, in.,	33
Height, in.,	60 1/2
Weight, lbs.,	540
Each =	\$65.00

This size and style of Refrigerator is especially designed for Grocers and Hotels, and meets the requirements of a large class of customers that require a Refrigerator larger than our No. 07. It is made in antique finish, filled and finished with shellac and coach varnish, the same as all our other styles. It has adjustable shelves or racks made of ash or maple, patent floor plates and malleable removable casters.

SIBERIA REFRIGERATORS. IMPROVED.

Antique Oak Finish, Handsomely Carved, Polished Brass Trimmings, Solid Metal Shelves.
Triple Walled, Charcoal Filled, Elegant in Finish.

Fig. No. D4294

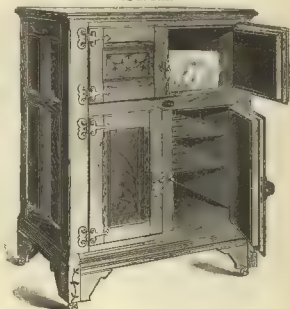

Cut showing Style No. 5.

Two Provision Chambers.

No.,	5
Size of Ice Chamber, in.,	28 x 17 x 14
Length, in.,	30½
Depth, in.,	24½
Height, in.,	50
Weight, lbs.,	290
Each—	\$32.00

Is especially adapted for small Boarding Houses and large or medium sized families, the two Provision Chambers render it very convenient. The door of either chamber can be opened without interfering with the other, thus saving the cold air, making it economical in the use of ice. It is an established fact that the larger sizes take but little more ice than the smaller, from the fact that a larger body melts much slower than a smaller one, and cools a greater volume of air.

Fig. No. D4295

Cut showing Style No. 06.

Two Provision Chambers.

No. 05 is same without partition between Doors.

Nos.,	05	06
Size of Ice Chamber, in.,	25½ x 16 x 15	29 x 16 x 15
Length, in.,	37	41
Depth, in.,	22½	22½
Height, in.,	48½	48½
Weight, lbs.,	230	300
Each—	\$32.00	\$6.00

Have large ice and provision chambers. They differ from our regular styles, having solid tops, the upper doors opening to the ice chamber instead of having the lid on top.

SIBERIA REFRIGERATORS.

With Water Coolers.

Antique Oak Finish, Handsomely Carved, Polished Brass Trimmings, Solid Metal Shelves, Triple Walled, Charcoal Filled, Elegant in Finish.

Length, in.	41
Depth, in.	40
Height, in.	96
Weight, lbs.	900
Each—	\$75.00

This style and size is especially designed for Grocers and Butchers. It is made of ash, beautifully carved, grain of wood filled and finished in antique with shellac and coach varnish, the same as all our other styles. It has our patent floor plates, and our patent malleable, removable, self-retaining casters; our new drip cup; solid brass locks and hinges. It has three doors, one for the ice chamber and two for the provision chamber. The center door has a panel of glass. The provision chamber has rows of hooks for butchers' use, as shown in cut, or with shelves in place of hooks for grocers' use, if so ordered. We make but one size of this style.

Our **Siberia Ice Chests** are made of hardwood, antique finish, and are neatly carved and finished with shellac and coach varnish, and are first-class in every respect. No other ice chests in the market will compare with them in style or finish.

Our Ice Chests are made with inside cases, and lined in the same manner as our Refrigerators. These Chests answer every purpose for keeping a cold atmosphere, but there being no circulation, the air is damp and will not preserve meats, etc., equal to dry atmosphere, as in our regular Refrigerators.

FIG. No D4337.

Cut showing Style No. A.

FIG. No D4336

Cut showing Style No. B.

Same as Style No. A, with Sideboard attached

No. B=	Weight	Length	Depth	Height	EACH.
	87 lbs.	19 in.	19 in.	41 in.	\$15.50

FIG. No D4338

Cut showing Style No. C.

A Combination Water Cooler and Refrigerator and a great convenience for use in the Nursery or Sick Room. Is also very convenient for keeping Wine or Beer cool and ready for use. Has a Porcelain Lined Tank for Ice and Drinking Water and is Trimmed and Finished in the same Superior Style as our other Regular Styles of Refrigerators.

No. C=	Weight	Length	Depth	Height	EACH.
	130 lbs.	19 in.	19 in.	63 in.	\$21.00

Above style is same as No. A, with Sideboard and Cabinet attached. The Cabinet has two drawers for storing small articles, and also has a slide which pulls out and forms a shelf. This Refrigerator is very convenient and occupies only a small space.

Pulley Blocks or Hoists.

WESTON'S TRIPLEX.

Fig. 1777.

EADES' DIFFERENTIAL.

Fig. 1778.

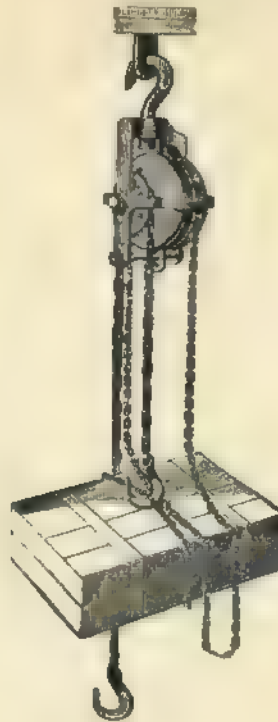

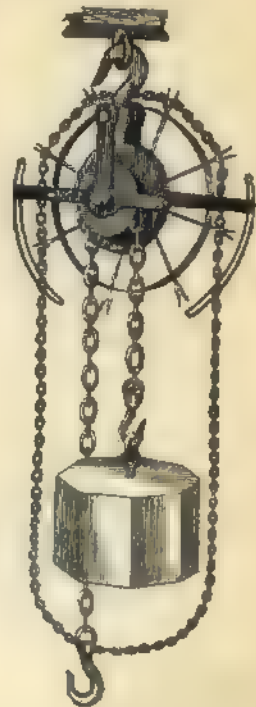

Fig. 1779

No. 1, Direct.

No. 2, Geared, with Sprocket Wheel.

Weston's Direct

Capacity, -	-	-	-	-	Tons,	$\frac{1}{2}$	1	$1\frac{1}{2}$	2
Complete, -	-	-	-	-	Each,	\$39 00	40 00	50 00	60 00
*Will Hoist, -	-	-	-	-	Feet,	8	8	8	9
Extra Hoist, -	-	-	-	-	Per Foot,	\$1 95	1 50	1 75	2 00
Weight, each, -	-	-	-	-	Pounds,	55	90	120	150

With the "Triplex" one man can lift 2,000 pounds. They hold the load at any point, and can not run down

Eades' Differential

Capacity,	No. 1, Direct.								No. 2, Geared, with Sprocket Wheel.							
	Tons,	$\frac{1}{2}$	$\frac{1}{4}$	1	$1\frac{1}{2}$	2	3	4	3	4	5	6	8	10	12	16
Complete, Each,	\$13 00	15 00	20 00	25 00	30 00	40 00	60 00	80 00	\$80 00	80 00	110 00	150 00	210 00	275 00	330 00	420 00
*Will Hoist, Feet,	7	7	8	9	10	10	11	11	10	11	12	13	14	16	18	20
Extra Hoist, Per Foot,	\$0 90	1 10	1 40	1 55	1 70	1 90	2 10	2 30	1 90	2 10	2 30	2 50	2 90	3 25	3 60	4 00

Diameter of Sprocket Wheel, Inches,	-	-	-	-	-	-	-	-	30	33	38	42	48	54	60	72

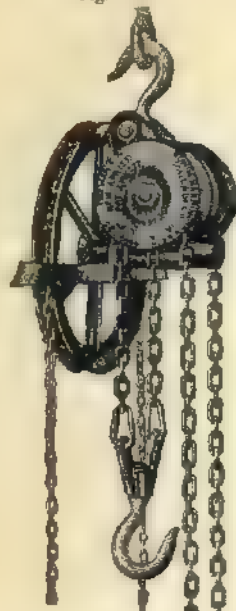

With the "Eades" one man can lift 2,000 pounds. They hold the load at any point, and can not run down.

*Figures denote approximate heights which Blocks with regular lengths of Chain will hoist, from level on which operator stands.

Pulley Blocks or Hoists.

HARRINGTON'S SCREW.

Fig. 1780

SPRAGG'S

Fig. 1781.

Harrington's Patent, Portable Screw Hoist.

Capacity,	Tons,	$\frac{1}{2}$	$\frac{1}{4}$	1	$1\frac{1}{2}$	2	3	4	5	6	8	10
Complete,	Each,	\$22 50	25 00	30 00	40 00	55 00	75 00	95 00	140 00	180 00	260 00	340 00
*Will Hoist,	Feet,	8	8	8	8	9	10	10	12	12	12	12
Extra Hoist,	Per Foot,	\$ 1 00	1 20	1 50	1 75	2 00	2 20	2 40	3 00	3 75	4 75	6 00
Weight,	Pounds,	35	52	65	76	140	226	258	625	750	875	925

With the "Harrington" one man can lift 2,000 to 4,000 pounds, it will hold the load at any point, and cannot run down.

*Figures denote approximate heights, which Blocks with regular lengths of chain will hoist above level on which operator stands.

Harrington's Patent, Quick-Lift Screw Hoists.

Capacity,	Tons,	$\frac{1}{2}$	1	14
Complete,	Each,	\$25 00	30 00	40 00
*Will Hoist,	Feet,	8	8	8
Extra Hoist,	Per Foot,	\$ 1 20	1 50	1 75
Weight,	Pounds,	52	65	76

This Hoist is made on same principle as the above, but arranged for more rapid work, more power is required to lift the load, but they are made sufficiently strong to sustain any required weight.

*Figures denote approximate heights, which Blocks with regular lengths of chain will hoist from level on which operator stands.

Spragg's Patent Hoists

Capacity,	Number,	10	12	14	16	18	20
	Pounds,	800	700	1000	1500	2500	3500
	Each,	\$3 00	3 75	4 25	5 00	6 00	12 00

These prices do not include rope; the height of hoist is limited only by the length of rope used.

ALFORD'S HAND.

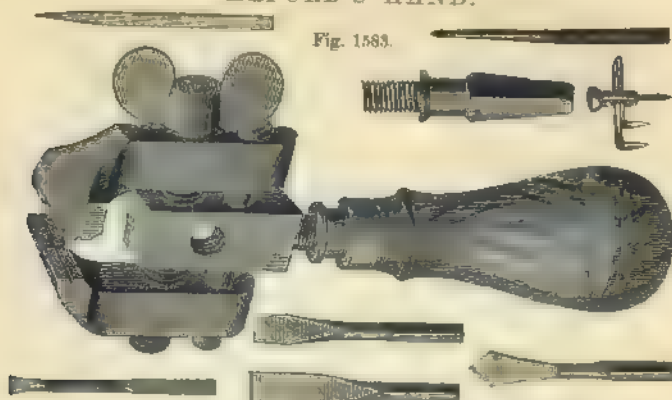

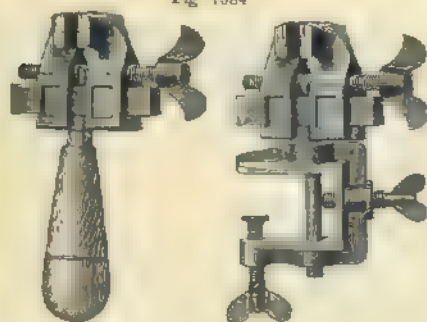

Fig. 1583.

Alford's Hand, Length $8\frac{1}{2}$ inches, Ten pieces. Steel Jaws, Width of Jaws $1\frac{1}{2}$ inches, Jaws open $1\frac{1}{4}$ inch, Hollow Rosewood Handle, Lignum-vitæ ax.

per dozen, \$21 00

The Handle contains 3 Awls, Countersink, Screw Driver, Chisel, Washer Cutter, and Bit Shank. The Handle can be unscrewed from the Vise, and the Bit Shank put in its place to be used as a Bit for an kind of boring or for cutting Washers. The Handle can be screwed into the Vise at a right-angle to its usual position, which is desirable for many kinds of work.

CIRCULAR SAWS.

Patent Ground and Tempered Solid Tooth.

HOW TO TELL THE DIFFERENCE BETWEEN RIGHT AND LEFT HAND CIRCULAR SAWS.

FIG. NO. 2880

WHEN IN USE ON SAW MILL

Standing in front of a Circular Saw, with the Saw revolving towards you, if the carriage upon which the log rests passes to the right of the Saw, it is a Right Hand Saw; if to the left, it is a Left Hand Saw.

WHEN NOT IN USE ON SAW MILL.

When Circular Saws are made perfectly flat on both sides, and the same thickness at the center as at the outer edge or periphery, they are either Right or Left Hand. All Circular Saws below 30 inches are made this way. However, when Saws above 30 inches are "bevel ground," that is, made thicker at the center than at the edge or periphery, they are made flat on the hand or log side, and "dish'd" or concave on the

opposite or off side, and consequently are not reversible. They are usually one gauge thicker at the center than at the edge, but this is not invariable. This "dish-ing" is necessary because of the centrifugal force; otherwise, when the Saw is in rapid motion, the outer edge would be so stretched that it would not cut correctly, and if it encountered a knot it would not cut through it, but would go around it. Saws thus "dish'd," when in rapid motion, assume a straight position on both sides and saw correctly.

In order to determine the Hand of a Saw, hold it up with the teeth towards you so it would revolve, and by the use of a straight-edge the flat side can be determined. This is the log or hand side, and the concave side is the opposite or off side. Thus, a Right Hand Saw will be flat on the right hand or log side, and "dish'd" or concave on the left hand or opposite side.

NOTICE. Orders for Saws not of Standard Gauge or Hole, as described in List, or irregular in any particular, will be accepted only with the distinct understanding that they are subject to delay in making, and are not subject to cancellation under any circumstances.

When ordering, be particular to state whether Rip or Cross Cut is wanted, Diameter of Saw in Inches, Right or Left Hand, and Size of Mandrel Hole.

	\$33.00

NOTICE.

In sharpening No. 120 Acme Saws, care must be used to file the teeth at the same angle as they leave the factory. They are made to run without set, and are so high in temper that an attempt to set them will break the teeth. We do not warrant these Saws that may be broken from this cause. In order to file properly, a six-inch Safe Back Cant File, made expressly for this purpose, should be used.

One-third Dozen in a Box.

Gem, with Tin Reservoir,	\$10 00
Gem, with Copper Reservoir,	12 00
Extra Bulbs,	.75
Extra Pots and Hoods,	1.00
Extra Burners,	.75

We guarantee that every Furnace can be worked out of doors or on roofs in all kinds of weather.

The Burner is Cylindrical in shape, and made of Cast Iron, and cannot burn out. It is so constructed, and the shape is such, that the Solder from the Soldering Copper cannot fall into the perforations. It is noiseless and a powerful heater. The heat is distributed full length of Copper. It is light and provided with a handle, making it portable. It is supplied with our Pneumatic Reservoir, which cannot be filled while Burner is burning. By the use of same accidents are prevented. The Heating Plate on which Coppers rest, is but five inches from workman's bench, and hood opening is of sufficient size to admit the largest size Coppers, which can be readily heated in a short time. It is also provided with a sliding cut-off and drip cup, of which knob is always cool. The patent Rubber Bulbs used on our Furnace are of the best quality, and will wear for an indefinite time.

One in a Crate. Weight, 20 lbs.

DOUBLE CUTTING HAND SHEARS.

Fig. 6507.

No. 1, Small, for Tin,

each \$2.50

No. 2, Medium, for Tin and Iron,

each \$3.00

These Shears are designed especially for cutting any kind of metal cylinders. The method of cutting, as shown in illustrations, avoids waste, and leaves the edges and corners perfectly smooth.

Tinnerns' Tools.

CIRCUMFERENCE RULE.

Fig. 6520

The Tinnerns' Circumference Rule is a useful tool for obtaining the circumference of a circle by simply measuring its diameter. As shown in cut, its top edge is graduated to 16ths of an inch; the bottom edge with so-called Circumference inches into 8 1/2. By measuring the diameter of a circle, with the edge graduated to circumference inches, the exact circumference of the circle is shown to 1/4 inch.

The opposite side of the Rule has tables of measurement as follows:

Liquid Measure, Flaring, 1/2 pint to 5 gallons.

Dry Measure, Flaring, 1/2 bushel to 2 bushels.

Cans, Pitched Top, 1 gallon to 10 gallons.

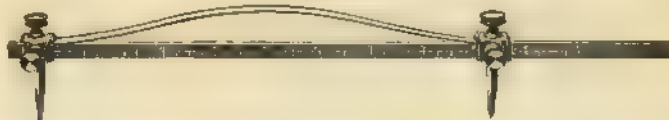

Dry Measure, Straight, 1 quart to 3 bushels.

Cans, Flat Top, 1 gallon to 200 gallons.

MAGIC PATTERN RULE

Fig. 6521

The Magic Pattern Rule consists of a Nickel plated Steel Bar 4 feet long, 1/4 inch square, graduated in Circumference inches on the front, and in inches and eighths on the back, with two slides, with set screws, into which frame points are fastened. It is put up in a neat wooden box with three steel ribbons of different gauges, which may be used according to size of elbow wanted. It is accompanied by the Magic Pattern Chart, mounted on linen, which contains elbow diagrams and rules for cutting all kinds of Flaring, Oval, Cylindrical, Cone shaped vessels, etc. with the aid of the Magic Rule. Besides all these, the Magic Pattern Rule may be used as a Straight Edge, Circumference Rule and Trammel.

Magic Pattern Rule and Chart, Complete, in Hinged Wood Case,	each, \$5 00
Magic Chart only, 19x23 inches, Mounted on Linen,	" 50

BARNES' HAND CIRCULAR RIP SAWS.

FIG. No. D1776

No. 11—Barnes', Hand Circular Rip Saws, Weight, complete, Boxed for Shipment, 275 lbs.,

EACH
\$50.00

This Machine will rip boards or planks of either hard or soft wood, of any thickness up to $3\frac{1}{2}$ in., and of any width up to 19 in. It is especially adapted to shops without steam or water power, and will, as nearly as possible, take the place of a steam rip saw in quantity and quality of work. It requires little space, and is built mostly of steel and iron.

The lumber is placed between two feed rollers, which feed it to the saw. The feed can be made slow or fast, as the operator may desire, by the cone pulleys on feed rolls. These rollers are self-adjusting to thick, thin or uneven lumber. The saw can be instantly set to or from the gauge to any width desired. With this Machine an operator with ordinary strength and endurance can easily rip (line measure) 600 feet of 1 in. pine per hour.

FIG. No. D1778

The above cut shows the Hand Circular Rip Saw with the front table placed directly over the Saw. The table is provided with an adjustable gauge, and by means of a hand screw at rear end it can be readily raised or lowered to govern the depth of cut by the saw. Arranged in this way, rabbets, bevells, tenons, etc., can be cut to advantage, and by using two saws, side by side, grooving for window and door stops, etc., can be done. We furnish an extra saw for this purpose with each Machine. The saws are 10 inches in diameter.

CUTTER HEADS.

FIG. No. D1775

FIG. No. D1777

EACH

No. 25—Cutter Heads, Widths, $\frac{1}{16}$ in., $\frac{1}{8}$ in., $\frac{3}{16}$ in., $\frac{1}{4}$ in., $\frac{5}{16}$ in., $\frac{3}{8}$ in., for Nos. 13, 15 and 17 Barnes' Combined Machines (Page 321),

\$1.50

No. 27—Cutter Heads, with 1 pair of Straight Knives, for Nos. 13, 15 and 17 Barnes' Combined Machines (Page 321).

Inches,	$\frac{3}{8}$	$\frac{1}{2}$	1	1 $\frac{1}{2}$	1 $\frac{3}{4}$	2
Each,	\$3.50	3.50	3.50	3.50	3.50	3.50

EACH.

Extra Knives, all Sizes, \$0.75

They will cut either with or across the grain, or across the end of stuff. These are fitted to use on the Saw Mandrel of the Combined Machine for cutting grooves, gains, dados, rabbets, etc., joints for boxes, drawers, etc.

Can be used to cut gains, dados, to rabbet, edge-up or joint stuff. Are used by builders to make window and door frames. Each width knife requires a corresponding width of cutter head.

SCROLL SAWS.

Fig. No. D943

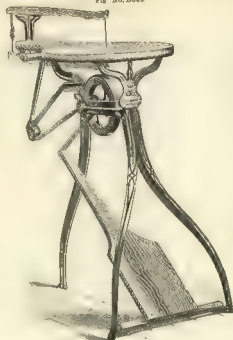

Fig. No. D946

Barnes', Improved.

No. 45 Barnes', Treadle, with Twelve 7 in. Saw Blades, Assorted, EACH. \$15.00

Swing around the Blade under the Arm, 24 inches; Length of Blade, 7 inches. Table and Arms of Hard Maple; Cast Iron Frame, strong, yet light; the Balance Wheel runs on Steel Arbors.

With reasonable practice, will saw at the following rates: Pine, 3 inches thick, 1 foot per minute, 1 inch thick, 4 feet per minute. Walnut, 3 inches thick, $\frac{1}{2}$ foot per minute; 1 inch thick, 2 feet per minute, and other woods and thicknesses at proportionate rates.

The ordinary rate of speed when sawing is from 800 to 1200 strokes per minute. The saw leaves the work as smooth as it is possible for any saw to do, and can be taken out and replaced in an instant for inside work.

Weight, Boxed, Ready for Shipment, 80 lbs.

No. 51 - Barnes', Velocipede, with Boring Attachment, including Twelve 7 in. Saw Blades, Assorted, EACH. \$20.00

No. 53 - Barnes', Velocipede, without Boring Attachment, including Twelve 7 in. Saw Blades, Assorted, 18.00

Cast Iron Frame; Table and Arms of Hard Maple, Swing around the Blade under the Arm, 24 inches; the Balance and Drive Wheels run on Steel Arbors.

This machine has about the same capacity as Scroll Saw No. 45, the warranty as to what that machine will do applying equally to this.

The Boring Attachment can be furnished at any future time, if not desired when ordering the machine. One $\frac{1}{2}$ in. Bit is included with the Boring Attachment.

Weight, Boxed, Ready for Shipment, 130 lbs.

We carry a larger stock of American Watches than any other firm in America. A call will convince any one of the fact, hence we can offer all orders for goods that are not in the stock of other jobbers. We have all new goods as soon as introduced, at market prices. The department is under the personal supervision of one of the firm, and its annual sales are greater than any other house. DISCONTINUED GOODS GENERALLY ON HAND, AT SPECIAL PRICES.

S. F. MYERS & CO.

How to Inflate Canvas Duck Decoys.

At first it is best to place the cork loosely in the air valve, then hold the air valve with your thumbs and fore-fingers. Take the cork out with your teeth and close your lips around the air valve and fill the Decoy tightly with air, and place the cork in the valve with your teeth before removing the lips, so as not to allow any air to escape.

MACHINE SHOP AND FORCE.

THIS IS A SPLENDID PIECE FOR SHOW WINDOWS.

This larger and more interesting toy represents the interior of a Machine Shop and Engine Room. It is 18 inches long by 11 inches high and 4 inches deep, nicely arranged in a wooden box. Our Upright Engine placed in position in the engine room will run the two lines of shafting, blow the bellows, and cause the old "smith" and his helper to weld a bar of iron with the "ten pound ten" blows of the hammers..... per doz., net, \$9 00

THE ELECTRIC TEACHER.

No. 306. Desk shape, oak case, fitted with electric bell and dry battery, six different cards of geographical, historical, arithmetical and amusing questions and answers, 8 1/2 x 10 inches, per dozen.....net, \$42 00

MECHANICAL ATTACHMENTS.

For Toy Steam Engines, 6x6 inches, per dozen, net, \$3 75

ROMEO AND JULIET.

Romeo plays vigorous, while Juliet peeps from her window and throws him repeated kisses, the old man peeks out from the half open door, and, missing Romeo, he rakes the dark lover suddenly acquainted with the toe of his boot, while the black cat under the window gets his back up at the row.

THE OLD MILL.

When the toy is in motion the Old Mill sails go round, and the old Miller beats his donkey, who instead of going ahead, kicks up behind, thus making an interesting scene.

VILLAGE PUMP.

When the scene is in motion, the youngster at the handle pumps hard, while the thirsty boy catches the running water from the spout in his hat and carries it to his lips and drinks, the three motions being extremely animated and natural.

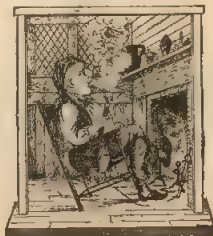

THE IRISH JIG.

When in motion the old man draws his bow to a lively tune, while Pat merrily steps out the jig to the tune of the old man's playing, at the same time twirling his black thorn Shillelah, in true Irish style.

THE ORGAN GRINDER.

When in motion, the Italian leisurely turns the crank, while Jocko takes off his hat, in thanks for the coin. This is a well known and always pleasing scene for children.

THE SMOKER.

When the toy is in motion, the flame and smoke of the fire go slowly up the chimney, while fat old Hans takes the pipe from his mouth, which he opens wide, letting great puffs of smoke roll upwards, the several motions making a very effective and realistic scene.

READ THE PREFACE BEFORE ORDERING.

FANCY DIALS ON ELGIN MOVEMENTS \$2.50 LIST EXTRA.

We carry a larger stock of American Watches than any other firm. A call will convince any one of the fact; hence we can often fill orders for goods that are not in the stock of other jobbers. We have all new goods as soon as introduced, at market prices. This department is under the personal supervision of one of the firm, and its annual sales are greater than any other house. DISCONTINUED GOODS AT SPECIAL PRICES OFTEN ON HAND.

S. F. MYERS & CO., NEW YORK.

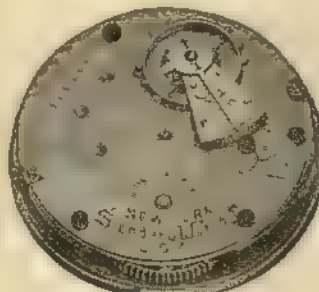

A Full Line of all Watch Materials will always be found in our Tool and Material Department. Refer to our Special Illustrated Catalogue, sent free on application.

Nelson's Patent Lateral Action.

No. 01-Fair Leather, Nickel Plated, Square, Bar Buckles, for 10 to 16 Gauge Shells,	PER DOZEN.
	\$21.00
One-half Dozen in a Box.	

The Shell Belts, with Shoulder Straps, should be worn under the Hunting Coat, buckled loosely behind, thus giving free action to the shoulders in handling the gun. The weight is evenly distributed and causes no inconvenience to the hunter. The Shells are carried wads up, handy to get at, so that quick changes can be made. The Cartridge Holders or Clamps are of the finest Crucible Spring Steel, tempered after they are formed, and carry 10 to 16 Gauge Brass or Paper Shells, crimped or not, with perfect safety.

Oider Mills.

IMPROVED FAVORITE

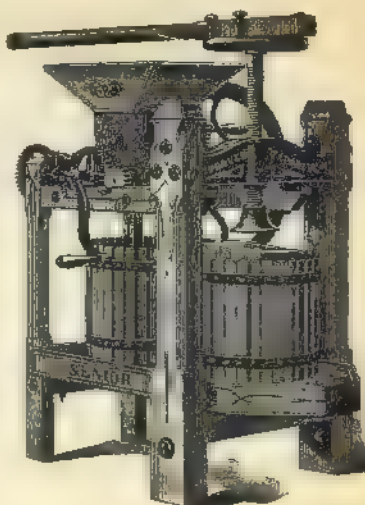

These Mills have hardwood frames, solidly bolted together, handsomely finished and striped, heavy cast iron beams and wrought iron screws, capable of standing the most severe pressure applied by the lever. They have larger Crushing Rollers and Crates than any other Mill. The Crates, of which there are two with each Mill, are put together with Rivets.

The Throat is adjustable, so that all sizes of fruit may be used. The Grinding Rollers are also easily adjusted, and as the faces of the Rollers are ground true to their centers, they are capable of very close adjustment, rendering it impossible for any of the pulp to pass through without being thoroughly crushed. One of the Rollers has serrated ribs, which, working against the straight ribs of the other, gives a shearing out, requiring less power. The Junior and Medium Mills have one Crank each, and the Senior Mills have two cranks each.

GAMES.

No. 435. Temple of Liberty, 15x17. This is a philosophical historical game, embracing the progress of the idea that the race has advanced or "progressed" from slavery to personal liberty since the time of King John of England.....per doz., \$5 75

No. 392. Madam Morrow's Fortune Telling Cards, 4½x8¼ inches. By the aid of these fortune-telling cards any one with very little practice can become expert enough to predict the future of his acquaintances and friends to entertain a company of young people or children agreeably for an hour or two. Every combination of the cards, as well as the card-themes, and the skill of the fortune-teller, changes the result. Consequently, the variety is limitless and the interest of a company is easily sustained, ½ dozen in package.....per doz., \$2 00

No. 395. "Authors Illustrated." Seventy-two cards finely engraved, representing events taken from the different authors and executed in the most artistic manner. Besides the four illustrations there are eighteen finely engraved portraits of prominent authors, ½ dozen in package.....per doz., \$2 00

No. 464. Game of Louisa on board. Board 16x17. Louisa is the best of a class of games containing all with moderate skill. It is a game which will meet the approval of the great majority of players of all ages. Two, three, or four may play it. By means of the throws of two dice the four men of each player are entered, one at a time for each die, carried around the spaces at the margin of the board back to the place of beginning, and thence moved to the center. The combination of a good throw, with skillful play, may enable a player to take up some of the adversaries' men and force them to start over again. The object is to get round and to the center of the board first with all a player's pieces.....per doz. \$8 00

NESTED BACKGAMMON BOARDS.

No. 447. Four Backgammon Boards which fit inside each other so that the whole nest is no larger than the largest board. Our board 100, not sold separately, is the smallest of four and measures 11x11 inches when open. No. 100½, 13½x13½ inches, is the next; No. 110, 14½x14½ inches, is the third, and No. 110½ is the largest, being 17½x17½ inches when open.....per dozen nests, \$8 00

No. 414. Palmistry, 6x8¼ inches. This is a set of fortune-telling cards, by the aid of which predictions are made from the hands of the players. It contains 110 cards. Each bears a diagram of some style of hand indicative of some peculiarity of fate. The game is adapted to amuse a party of young people or to aid in telling fortunes at public or other entertainments. No particular skill is required, ½ dozen in package, per dozen.....\$4 00

READ THE PREFACE BEFORE ORDERING.

On orders for \$50 00 or over, for Holiday Goods only, pages 4 to 125 (to those who have established credit with us), bills will be dated Nov. 1, 1892. No charges made for Boxes and Cartage.

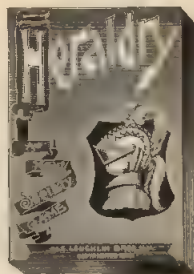

No. 385. Christmas Stocking Series $4\frac{1}{2} \times 6\frac{1}{4}$, six kinds, put up in assorted dozens. Christmas Stocking Game, The Judges' Game, Cards, Merry Matches, Which is it? or Pay, What D'ye Buy? The Game of City Life, 1 dozen in package..... per doz. \$2.00

No. 409. Heraldry and Lost Heir, $7\frac{1}{2} \times 7\frac{1}{4}$ inches. This set contains the two games included in the title. Each of them is played with 32 handsome cards. Heraldry has cards representing various devices of chivalry, while Lost Heir has devices to designate the police officers of the cities who are searching for the Lost Heir, per doz., \$4.00

GAMES.

No. 866. Game of Heraldry, $5 \times 8\frac{1}{2}$, lithographed label, 32 cards in colors representing heraldic devices of various sorts. A bright and attractive card game. 1 dozen in package..... per doz. \$2.00

No. 698. Bewildered Travelers, Mariner's Compass, Sunday-school, Tower of Babel. These games are simple in play and adapted to the use of children. In all, the mode of play is to move the pieces around the board by the spins of a tictotum. From two to four may play.

The names of these games will be sufficient to insure the popularity of the series. They are old friends in new dress, the Rainbow games made over with new labels and handsome boxes.

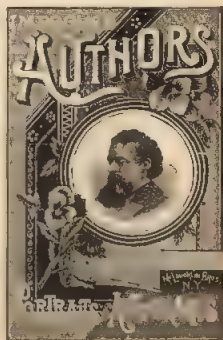

No. 537. Magnetic Fish Pond, $14\frac{1}{2} \times 14\frac{1}{2}$. It is a game for children..... per doz. \$12.00

This Fish Pond differs from our Improved Fish Pond entirely. It consists of a tank or aquarium of cardboard. It is covered on the outside with pictures representing fish swimming in water as seen through the glass of an aquarium. The fish used in the game have wire rings in their mouths. They are put out of sight on the bottom of the tank. The "hook" is a magnet on a pole and line. The magnet is drawn around the bottom of the box. When it meets a ring in a fish's mouth, the ring adheres to the magnet and the fish may be drawn out. The element of luck appertains to this game more than to our other Fish Ponds, for the reason that the fish can not be seen at all before being caught.

No. 488. Prize Series, $8 \times 11\frac{1}{4}$. Three kinds, two games in each, put up assorted, $\frac{1}{2}$ dozen in package, per doz..... \$2.75

Rainbow Backgammon, Ten Up, Going to

No. 84. Improved Authors—popular edition. Series, 3 kinds, put up assorted in dozens..... per doz. \$7.00
Improved Authors Popular Edition
Improved Authors Poets
Improved Authors Queens of Literature.

No. 5. The World's Fair Game. The game of the season. Everybody wants one this year. It is a beautiful and showy article showing an exact reproduction of the Exposition grounds and buildings at Chicago. It is also a beautiful and showy article..... per doz. \$8.00

No. 169½. A B C of Funny Animals, shaped, 1 dozen in package, per doz., \$2 00
This book is the same as No. 169, except that the top is cut out, as shown in the engraving.

No. 166½. Our Baby's A B C, shaped, 1 dozen in package..... per doz., \$2 00
The same as No. 166, but cut out in fancy shape.

No. 151½. A B C of Birds, shaped, 1 dozen in package..... per doz., \$2 00
The design of the cover and the shape into which this book is cut are shown in the engraving. The book is like No. 151, above, except that it is cut out as shown.

No. 788. Red Line Books, 101 Stories, assorted, ½ dozen in package, per doz., \$2 75
Pleasure Book, Animals and Birds, Chatty Chatty Stories, Merry Doings of Childhood.

No. 738. Old Nursery Stories, 5½x8 inches, assorted, 1 dozen in package, per dozen..... \$2 00

This book contains 72 pages, 36 of which are full page colored illustrations. The cover is bright red, decorated with colored vignettes of the subjects within the book and the title. It has a stiff cover. The contents are the Pleasantest Series of former years, bound into a single volume. These are: Old Mother Hubbard and her Dog, The Three Little Kittens, The Old Woman and her Pig, The House that Jack Built, The Five Little Pigs, Old Dame Trot and her Cat.

Hours in Story Land, ½ dozen in package..... per doz., \$2 00
The same as "Good Time Story Book," except that the cover, pictures and stories are different.

Mammoth Story Book, ½ dozen in package..... per doz., \$4 00
This book is made up of the two above bound together. It is two inches thick, well bound so that it will not come to pieces, has a handsome lithographed and varnished cover, and is well printed so that every cut is clear and distinct and all the type legible.

No. 178. Robinson Crusoe Pantomime Book, 10½x12½ inches, 1 dozen in package..... per doz., \$2 00
The pictures are very bright and handsome, and the combinations almost infinite in variety.

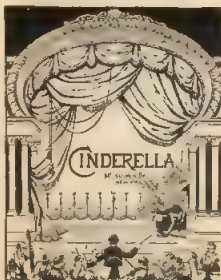

No. 132. Three Little Kittens, shaped, 8½x11 inches, 1 dozen in package, per dozen..... \$1 00

This is a new edition of the old story. The pictures are from new designs, there being 8 full page illustrations in colors. The book is cut out after the manner of the "Three Little Pigs" shown above.

No. 134. The Three Bears, shaped, 8½x11 inches, 1 dozen in package, per dozen..... \$1 00
This book contains the story of the Three Bears with new illustrations. It is similar in the Three Little Kittens and to the Three Little Pigs shown above.

No. 136. The Three Little Pigs, shaped, 8½x11 inches, 1 dozen in package, per dozen..... \$1 00
This book contains 6 full page colored pictures from new designs. The style of the cover is shown in the cut.

No. 176. Cinderella Pantomime Books, shaped, 9½x12½, 1 dozen in package..... per doz., \$2 00

The front of each, when the book is closed, represents the proscenium arch of a theater, with curtain, footlights, and the orchestra as if in the act of playing an overture. The cover and the different pages are divided down the center, and as they are lifted one after the other, fold back to each side, disclosing the stage, and upon it, a series of tableaux representing scenes in the story, which is told in verses below. On the backs of the covers and the pages, tiers of boxes are depicted, so that when a book is opened at any page, the whole presents the appearance of a theater.

No. 702. Good Old Stories Series, six kinds, 6½x8½ inches, 32 pages, covers handsomely printed in colors, put up assorted, 1 dozen in package, per dozen..... \$0 80

They are just what they are called, and comprise the stories of Aladdin, All Baba, Beauty and the Beast, Cinderella, Robinson Crusoe and Rip Van Winkle, each book containing from 18 to 24 plain pictures.

No. 704. The Prattle Series, 1 dozen in package, assorted..... per doz. \$1 00
A series of very pretty little stories for young children, with a number of plain black illustrations. Printed on good paper, handsome covers, in colors, six kinds, viz.: The Rook's Advice, The Disobedient Mouse, The Lost Kitchen, Wooden Legs, Monkey Jack, Rags and Tatters.

No. 706. The Bright-Side Series, half-bound, six kinds, 9½x12, 32 pages, plain, put up assorted, 1 dozen in package..... per doz. \$1 00

Each book contains a well assorted series of stories, sketches and descriptive matter of a wholesome nature, written in a popular style, adapted to the wants and ideas of children. Each also contains a bountiful supply of illustrations, which make them doubly attractive. Christmas Eve, The Thieving Jackdaw, Fleet and his Master, Louis's Mischief, A Gingerbread Dream, Round About the Farm.

No. 700. Fairy Tale Series, four kinds, 1 dozen in package..... per doz. \$0 80

These are board covered books, trimmed flush, with 16 pages, attractive, highly colored covers entirely new in design. There are eleven pictures in each book. Giant Hunt, Patty and Her Pitcher, Tiny and Her Fairy, and The Giant and the Dwarf.

No. 701. Rose-Bud Series, six kinds, half-bound, 8½x11 inches, put up assorted, 1 dozen in package, per doz. \$0 70

This series is the best ever issued for the price, 30 pages, full of pretty pictures and simple stories, or easy lessons. The covers have beautiful pictures, printed in colors. The titles are: Pictures and Prattle, Gems for Little Ones, Our Pet's Picture Book, Sunbeams in Print, Chats for Little Folks, Pearls for Children.

Good Time Story Book, 8½x9 inches and 1 inch thick, ½ dozen in package, per dozen..... \$2 00

A compendium of short stories with many black pictures. The whole is well printed and substantially bound in a board cover with handsome lithographed and varnished labels. The best book in the market for the money.

READ THE PREFACE BEFORE ORDERING.

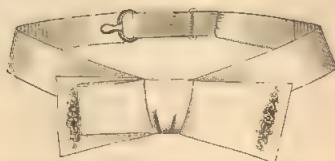

On orders for \$20.00 or over, for Holiday Goods only, pages 1 to 112 (to those who have established credit with us), bills will be dated Nov. 1, 1893. No charges made for Boxes and Cartage.

THE ARIOPHONE.

No. 1070.

No. 1070.

The Ariophone is a new departure in the line of accordions, being a combination of reed and metallic tones. It may be played as an accordion or as a chime of bells, and in either case it will produce characteristically musical effects. The performer, by manipulating the proper stop, may also combine the two tones, (reed and metallic), and thus produce a richly harmonious effect.

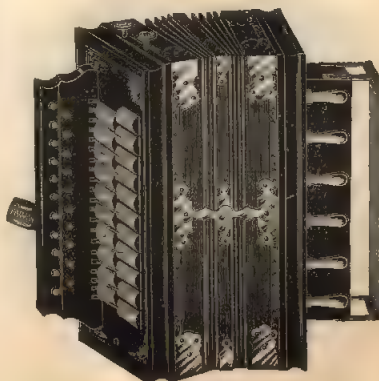

Broad ebonized frames, ebonized panels, ebonized keys, gilt and nickel ornaments, nickel corners and clasps, double bellows, with chimes attachment, 10 keys, 3 stops, 2 sets reeds, each, \$6.00.

MULTUM IN PARVO.

No. 1073.

Accordeons possessing the required variety of tone in the bass have, heretofore, been too large and unwieldy to meet with public favor. The New Imperial Accordion obviates this defect by having an improved bass box, with six basses (four major, two minor). Being much smaller than the old styles, they are more easily handled. This later feature is one long desired by accordion artists. Considering the quality and volume of tone in these instruments, they are simply par excellence.

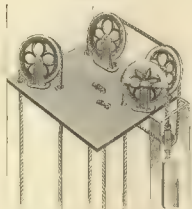

Ebonized mouldings and panels, gilt stamped leatherette bellows, open key-board, nickel keys, clasps and corners, double bellows, 21 keys, 2 stops, 4 sets reeds, 6 basses, each, \$10.00.

No. 1073.

Weston's Differential Direct.

One man can lift 1000 lbs.

Capacity, Tons.	Will Hoist from Level on which Operator Stands.	Shipping Weight, Complete.	EACH.
$\frac{1}{8}$	7 ft.	11 lbs.	\$10.00
$\frac{1}{4}$	6 ft.	22 lbs.	13.00
$\frac{1}{2}$	7 ft.	30 lbs.	15.00
1	8 ft.	51 lbs.	20.00
$1\frac{1}{2}$	8 ft.	81 lbs.	25.00
2	9 ft.	122 lbs.	30.00
3	9 ft.	173 lbs.	40.00

Weston's Differential Triplex.

One man can lift 4000 lbs.

Capacity, Tons.	Will Hoist from Level on which Operator Stands.	Shipping Weight, Complete.	EACH.	Extra Lift per Foot of Chain	Additional Cost
$\frac{1}{8}$	8 ft.	52 lbs.	\$30.00	\$1.90	\$1.20
1	8 ft.	86 lbs.	40.00	2.00	1.30
$1\frac{1}{2}$	8 ft.	132 lbs.	50.00		
2	9 ft.	225 lbs.	60.00		

The name Triplex has been adopted because of these features, viz.: A triple gear being the equivalent of three parallel shafts, each pair geared together with three pairs double pinions, insuring equal distribution of the load, with three-fold the efficiency of its predecessors.

Duplex, Convertible Screw.

Capacity in Tons.	Will Hoist from Level on which Operator Stands.	Shipping Weight Each, Complete.	EACH	Extra Lift per Foot of Chain, at 100 lbs. per foot.	Additional Cost
$\frac{1}{2}$	8 feet.	44 lbs.	\$25.00	\$1.50	\$1.20
1	8 feet.	56 lbs.	30.00		1.30
$1\frac{1}{2}$	8 feet.	76 lbs.	40.00		1.60
2	9 feet.	110 lbs.	50.00		1.90

Packed One in a Case, Complete.

In the use of the above one man can lift 1000 to 4000 pounds. They hold the load at any point and will not run down. When arranged for Safety lowering, the hand-chain must be continuously operated or the load will stop; when converted for Dispatch lowering, the load can be "spun" down after it is started. This conversion can be readily made by anyone.

Extra Lift Blocks not carried in stock and can only be furnished by being shipped direct from factory.

Dumb Waiters.

NEW YORK SAFETY.

Fig. 3742

Fig. 3742 shows perspective view of the wheels A, B, D and C, as arranged in most cases, and as shown in Fig. 3745. The brake grip attachment should always be placed on under side of the shelf on which fixtures are set.

Fig. 3748.

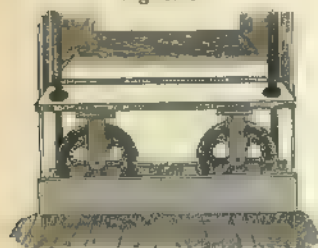

Fig. 3748 shows the guide wheels at bottom of Waiter, and the manner of boxing in to prevent rope from running off.

For stringing these Waiters, use $\frac{1}{2}$ inch pliable cotton rope, and for safety rope $\frac{1}{2}$ inch pliable cotton rope. Always take the slack out of the rope before stringing the Waiter. The guide runs should be $\frac{1}{2}$ inch wide by $1\frac{1}{2}$ inch deep, and are better if coated with blacklead.

A set of fixtures, as packed in a case complete consists of the following pieces: Six 8-inch Wheels, two 4-inch Wheels, one Pulley for weight and Safety Rope, five 12-inch Turnbuckles, one $\frac{1}{2}$ inch Turnbuckle, one Ring for Safety Rope, one Brake Grip, one Ring for Brake Cord, one Hooded Pulley for Grip, one Patent Plate and full directions for setting up. Fixtures complete. - per set, \$15 00

When desired, we can furnish with fixtures Counterweight Guide Runs, Weight Runs, Car 80 inches high by 18 to 24 inches square and a ropes for first ten feet in height. Complete. - per set, 40 00

Each additional foot in height, - - - - - 40

Fig. 3744

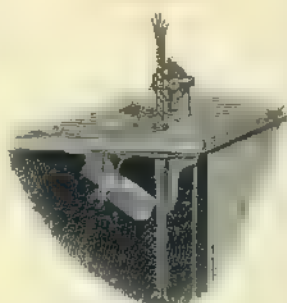

Fig. 3744 shows the brake grip for the New York Safety Dumb Waiter Fixtures as placed on under side of shelf on which the fixtures are set, also the small hooded pulley which is placed on top of the shelf and over which the brake cord runs.

Place the brake grip in such position that the hand rope which elevates the car will run through it. To apply the grip, pull the small cord which runs down the well. To release it, pull down the hand rope and the grip will drop off. Attach the small ring to end of cord on first floor. Use $\frac{1}{2}$ inch cord for brake.

FANS.

A large line of exotic leather Fans in all colors.

Ornate fans for misses in all colors

Our past efforts in this direction have met with such good success that we have been encouraged to constantly add to the line, until now we can safely say that we show a more suitable line of Fans for the general trade than any other house.

The fact that we have direct connections with all the best AUSTRIAN, FRENCH and JAPANESE makers and that our buyers deal directly with them enables us to secure, at all times of the year, novelties suitable for the season.

For the Winter and Holiday season, we will show a very complete line of Real Ostrich Feather goods, in all the fashionable colors and evening tints, with wood, ebony, ivory, tortoise-shell and mother-of-pearl sticks ranging in price from the cheapest grades to the very fine qualities.

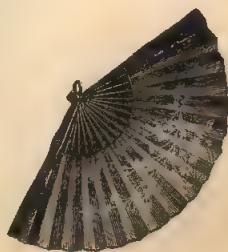

In Silk, Crepe, Gauze and Lace Fans, with carved bone and fancy wood sticks, we have a good assortment.

When in need of anything in this class of goods, either for your regular stock or for a special purpose, we ask you to give us a trial.

In ordering, please give us as good a description as possible of what is wanted, and state color and about the price you wish to pay.

No. 2 Fan Easel, for display of all kinds of folding fans, fancy brass wire, mahogany wood bottom, per dozen.....bet \$4 50

READ THE PREFACE BEFORE ORDERING.

**THE JUNIOR.**

The set contains five blocks, the largest being $3\frac{1}{2} \times 3\frac{1}{2} \times 4$ inches, and the smallest $2\frac{1}{2} \times 2\frac{1}{2} \times 3$ inches. The sides are decorated with handsomely lithographed subjects especially attractive to children. Each subject has a descriptive title below it. Upon the tops of the set are the letters of the alphabet divided among the different blocks, 26 in package, per dozen.....\$1.75

No. 578. Thirty-one inches high, $4\frac{1}{2} \times 4\frac{1}{2} \times 6\frac{1}{2}$ inches closed. The set contains 31 blocks, the pictures on which illustrate the stories of "Tom Thumb," "Puss in Boots," "Goody Two Shoes," "Three Bears," etc., per dozen.....\$4.00

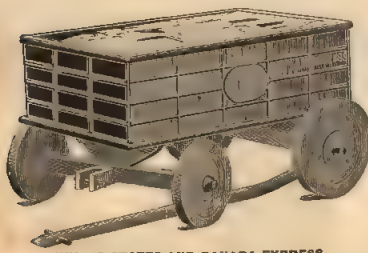

No. 509 1/2. Thirty-two inches high, $4\frac{1}{2} \times 4\frac{1}{2} \times 6\frac{1}{2}$ inches closed. The set contains 32 blocks, the pictures on which illustrate the stories of "Three Bears," "Peggy," "Wandering Bunt," "Mischievous Monkey," "Humpty Dumpty," etc., per dozen.....\$4.00

PYRAMID AND A B C BLOCKS.

No. 509. Forty-one inches high, seven inches square closed. The blocks are covered with bright colored and amusing pictures of a bolder character than our other sets, so as to be more easily made out by small children, and have an alphabet on the top.....per doz., \$6.75

No. 580. Little Bo Peep Alphabet and picture blocks, 38 inches high, 7 inches square when closed, per dozen.....\$6.00

**UNITED STATES AND CANADA EXPRESS.**

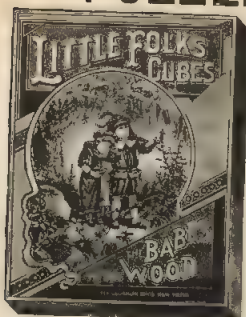

These wagons are of large size and very strongly and neatly made, having heavy hardwood running gear fitted in shell, striped wheels, lithographed body with dark wood lining top and bottom. Filled with hardwood building blocks.

No. 117. Size, 17x11x23.....per doz., \$27.00
No. 126. Size, 15x8 1/2 x 24.....per doz., 15.00

READ THE PREFACE BEFORE ORDERING.

On orders for \$50.00 or over, for Holiday Goods only, pages 1 to 113 to those who have established credit with us, bills will be dated Nov. 1, 1895. No charges made for Boxes and Cartage.

PUZZLES AND CUBES.

- No. 520. Little Folks Cubes, 8x11 inches, series—six kinds: Cinderella, Puss in Boots, Gandy Two Shoes, Red Riding Hood, Jack and the Beanstalk, The Three Bears. These sets of blocks contain twelve cubes, each two and a half inches square. Upon the cubes of each set are portions of six pictures, illustrative of the stories indicated by the titles. When the cubes are properly set up, the complete pictures are formed. To form the pictures is the object of the play, per dozen..... \$5 50

- No. 594. Artistic Puzzle Cubes, two kinds, size, 8x10 1/2 inches. The puzzle cubes contain 12 2 1/2-inch cubes, and make 12 different pictures—six cubes making a picture, and six pictures appearing upon each set of six cubes. The subjects are the old time ones: The Three Bears, Old Mother Hubbard, Bo Peep, Puss in Boots, Jack the Giant Killer and Red Riding Hood; also one set of pictures which do not illustrate any story, but are designed to attract by their adaptation to the wants of children, and by their beauty generally per dozen..... \$5 50

- No. 545. The Pretty Village, size 1, two kinds. No. 1, 8x10 1/2 inches, five houses; No. 2, 8x10 1/2 inches, five houses, 1/2 dozen in package..... per doz., \$4 00
No. 547. The Pretty Village, size 2, 16x14 inches. This story village is a set of ten cardboard houses, stores, churches, etc., printed to represent the streets, hinged together so that they fold up when the roofs are taken off. They are about 4 inches on the ground and 4 1/2 inches high. When set up they make a pretty imitation of a village street..... per doz., \$8 00

- No. 568. The World's Fair Building Blocks. Size 8x10 1/2 inches. These cubes are 2 1/2 inches square, 12 in a set. The pictures are of the Machinery Hall, the U. S. Government Building, the Building of Mines and Mining, Agricultural Hall and the Transportation Building..... per doz., \$5 50

- No. 549. Columbian Exposition Cubes, 11x22 inches. This box of puzzle cubes contains 32 2 1/2-inch blocks, the box itself being 11x22 inches. The pictures on these blocks are of the buildings on the Fair Grounds at Chicago. They represent the Machinery Hall, the U. S. Government Building, the Building of Mines and Mining, Agricultural Hall, and the Transportation Building, per dozen..... \$12 00

- No. 546. White Squadron Picture Cubes, 11x9 1/2 inches. These puzzle cubes are put up in a wooden box 11x9 1/2 inches, with a very attractive label representing the new fleet of United States men of war. There are 32 2 1/2-inch cubes in the set, with parts of six of the pictures of new navy vessels on each. When properly put together they make the fleet, more famous as the U. S. S. Philadelphia, the Prairie, or Cruiser No. 12, the Boston (same as the U. S. S. Atlantic), the New York, per dozen..... \$12 00

- No. 548. Army Tent and Soldiers. Two kinds, put up assorted, 6x11 1/2 inches. These boxes contain sixty of our new paper soldiers—24 kinds, ten of each kind—in stands to make them all stand upright, and four tents. The soldiers are intended to be cut out and put on their wounds, 1/2 dozen in package, per dozen..... \$2 00

Twist Drill Grinding Machine.

STANDARD.

Fig. 1780.

Complete, with Column and Countershaft,

each, \$100 00

This Machine is adapted for Grinding to a proper angle and with a suitable clearance, the cutting Lips of Twist Drills.

Please note the following facts, viz: This Machine holds in the same Chuck, Drills from $\frac{1}{8}$ to $\frac{1}{2}$ inch and grinds both sides without removing drill from chuck, thereby reducing the time of grinding to less than one-half that of any other machine in the market.

It grinds both sides exactly alike, and leaves the point a perfect center. More or less clearance may be given, as desired; nothing is left to the judgment of the workman.

All wearing parts are made of hardened steel, carefully tempered; all parts of these Machines are made interchangeable so that any part of the Machine can be duplicated with certainty of fit.

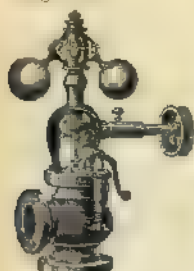

The Emery Wheels are made specially and run with water to prevent drawing of temper. Size of wheel 9 inch diameter and 14-inch face. The grinding is done on side of wheel, which can be kept properly dressed by using the too-holder and diamond in place of grinding attachment in taper socket on upper side and running same across the wheel by means of small hand wheel and feed screw. A wheel can be run on left end of spindle for ordinary tool grinding. Speed of Emery Wheel 1,600 revolutions per minute.

VIOLINS.

No. 1207. Professional violin reddish brown color, polished, ebony finger-board and tail-piece.....each, \$10 50

To enhance the popularity of the violin as an instrument for ladies, we have had manufactured by one of the first European makers instruments four-fifths the regular size, which cannot but commend themselves for the purpose designed they being lighter, more easily handled, and less cumbersome than the ordinary violin.

To insure genuineness, purchasers should see that each instrument bears the stamp upon the neck as shown above.

For Rubber Pillows, see Page 1606.

BOATS.

Fig No D7845

No. 4

Cut showing the two Sections Nested.

W. E. Bond's Improved Sectional Boat. For Exploring, Fishing, Hunting, Trapping and Traveling. Materials and Fittings.

The sides are of Galvanized Iron, three times as strong as wood. The part next to the bottom board is lined with a thin board held in place by the ribs to prevent denting.
The Bottoms are air-seasoned, kiln dried and saturated with an oil cement - three-fourths of their liability to swell and shrink is removed.

The Rowlocks are of the Y or yoke pattern. The outriggers are a very late improvement, made so as either to turn down and hang inside, or take out.

The Sculls are of ash. A pair of Sculls and Rowlocks are furnished with every Boat.

Each Boat has an Air Chamber attached, to prevent sinking when filled with water.

In wild fowl shooting the sections are often used separately, and in making portage it is frequently desirable to have them detached.

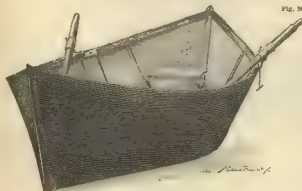

At an extra cost of \$10.00 for Mast and Sail, and \$7.00 for Deck, Step for Mast and Iron Lee-Board, these can be made excellent Sail Boats.

No. 4 Boats, each, \$42.00

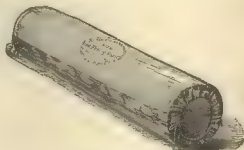

Extreme Length, 15 feet. Midship Height, 11 inches. Carrying Capacity, about 500 pounds. Extreme Width, 36 inches.
Either section of a 15 ft. Boat will carry one person. Weight about 100 lbs.

ACME FOLDING CANVAS BOATS.

Fig. No. D7846

No. 2, 12 feet. Boat Extended.

No. 2, 12 feet. Boat Folded.

Length of Bundle 50 inches, Diameter of Bundle 9 inches.

The Canvas is heavier than is usually used in making boats and is stronger than the usual thickness of birch bark and cedar used in making canoes. We use the best No. 4 and No. 6 hard woven canvas. The canvas alone weighs nearly 20 pounds.

The Oars are spruce, jointed with heavy brass ferrules, finished with shellac and varnish, copper tipped and leathered. They are made especially light, with the exception of the blades, which are thicker than the ordinary oar blade to prevent their being split during transportation.

The Waterproofing is the most expensive and the best now in use and is mostly made of Rubber. Supported only at the ends, it will sustain without bending to any perceptible degree a weight of 150 pounds placed in the center of the boat.

No. 2 - Length 12 feet, beam, 45 inches, depth at stem and stern, 22 inches, depth amidships, 14 inches, weight in its light form, 35 pounds; weight complete, 50 pounds, capacity, two and three passengers.

Price of Boat with One Pair Oars and Two Seats, \$40.00

For Rubber Pillows, see Page 1606.

U. S. Cruiser "New York" Silver Service.

Presented by the citizens of New York through
The New York Herald.

"All infant North Carolinians are 'rocked to sleep' in old tar barrels instead of cradles, and become at a very tender age acquainted with all the virtues of 'tar, pitch and turpentine.' Mothers—that is to say, careful mothers—stick their children to the floor with pitch to keep them out of mischief, give them spts. of turpentine as a beverage for vermin, whip them with pine tags when naughty, and wash them in tar water at least once a week. Consequently a mangy North Carolinian is a *rara avis*. But I have used PACKER'S TAR SOAP on patients from a distance with marked good results, and if ever I get hold of a scabby stranger I'll lather him from head to heel with your soap."

The above extract from a letter of a well-known Southern physician pleasantly shows the appreciation of the sanitary influences of the pine by the people most familiar with it.

Prof. D. G. BRINTON, M. D., LL. D., Phila., says: "PACKER'S TAR SOAP is remarkably pure, cleansing and healing; contains the balsamic virtues of the pine in a high degree, and is soft and refreshing to the skin."—*Med. and Surg. Reporter.*

A CARD FROM DR. ROSENTHAL.

"THE MEISTERSCHAFT SYSTEM" was written by me twenty-two years ago. The science of practical linguistics has so rapidly advanced of late years, that I became dissatisfied with my former works, and after twenty years' experience I have at last matured an improved system for studying and teaching languages, entitled

"THE ROSENTHAL METHOD OF PRACTICAL LINGUISTICS."

It teaches languages from the pupil's standpoint, and the lessons are so natural, easy and practical that any one is enabled to learn to speak fluently and correctly German, French or Spanish. Thousands of educators have sent me their enthusiastic endorsements, and I most heartily commend my latest work to all persons desirous of speaking foreign languages.

RICHARD S. ROSENTHAL.

GERMAN, FRENCH, SPANISH

SPOKEN AT HOME IN TEN WEEKS

for practical people by Dr. Rosenthal, formerly private tutor to the Imperial Family of Austria, Official Chief Interpreter for the City of New-York, etc. Pupils taught as if actually in the presence of the teacher. Dr. Rosenthal answers all questions and corrects all exercises free of charge. Circulars and Book of 32 Sample Pages from the three languages sent free on receipt of four cents in stamps. Part I (13 lessons, 96 pages), fifty cents. Complete Works (either language) and Membership in our Correspondence School, Five Dollars.

Mastered in ten weeks without leaving your home, by "The Rosenthal Method Practical Linguistics." Not a book in the common acceptance of the word, but practical lessons Complete Works (either language) and Membership in our Correspondence School, Five Dollars. POLYGLOT BOOK COMPANY, CHICAGO, ILL.

Doctors and other people like the Ivory Soap because of its simplicity. Being a pure natural soap it is not necessary to conceal its quality with strong perfume, coloring matter, or tar.

Dr. James C. White, of Boston, Professor of Dermatology in Harvard University, says:

"In selecting soaps for the toilet, those which are white and mostly free from scents should be chosen, for impure materials in their manufacture may be easily disguised by strong odors and colors. There is no positive virtue in Castile Soap as is so generally supposed, nor in carbolic, tar or other medicated soaps for ordinary purposes; the simpler the soap the better."

WRITING MACHINES 79

The
Number
6

The
Number
6

Remington Typewriter.

A DEVELOPMENT—NOT AN EXPERIMENT.

Many Desirable Improvements

Successfully incorporated into this new model.

NOTABLE AMONG THEM ARE :

Adjustment of Cylinder. Securing greater permanence for the original alignment of the machine.

Spacing Mechanism. Greatly improved. Lighter and quicker working parts, reducing wear, and increasing speed of the machine.

Carriage. Lighter, stronger and of greater capacity, greatly promoting ease of operation, as well as improving quality of work.

Ribbon Movement. Retains all the merits of the simple and effective motion hitherto used, and insures a greater economy in the use of ribbons, as well as greater convenience to the operator.

Touch. Uniform and easy beyond anything yet attained in any machine.

Paper Feed. Dispenses with the rubber bands without losing their advantages.

Envelope Holder and Paper Guides. Readily adjustable to any part of cylinder, facilitating work with narrow paper or on envelopes.

AND MANY OTHER USEFUL AND CONVENIENT DEVICES.

Illustrated Catalogue and full description sent on application.

SCHOOLS

NEW-YORK, New-York, 91st St. to 92d St. & Central Park West.
RUGBY ACADEMY, a boarding and day school for boys, is most delightfully situated on a knoll 20 feet above the street, immediately opposite and overlooking Central Park, and offers all the advantages of a suburban school. The athletic grounds surrounding the house cover an acre and a half, with a 220-yard running track, tennis courts and ball field. Large, sunny class-rooms and gymnasiums, gymnasium and library. Preparation by experienced instructors for all Colleges, Scientific Schools and Business. Special Coach for field games and sports. The number of resident pupils being limited to twenty renders it possible to give individual attention to the boys, and exert that home influence and association so necessary to their proper moral and social development. Illustrated catalogue on application.

168-172 Eighth St., Brooklyn, N.Y., U.S.A.

The Queen Binocular Telescope.

Is pre-eminently the best aid to the vision yet invented, comparing with the most powerful field glass, as the latter does to the ordinary opera glass. Its remarkable power in bringing out scenery and objects far beyond the reach of the naked eye, makes it indispensable to seamen, officers of the Army, ranchmen, stockmen and farmers, while tourists find it invaluable as a source of entertainment and instruction. Size in case 6 1/4 in. long by 1 3/8 in. thick—about one-third the size of a field glass.

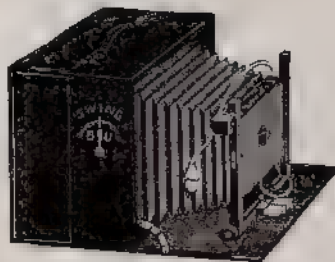

None are genuine without the name, *Queen & Co.* engraved on the eye pieces.

Send for catalogue.

PIANO FORTES 47

The Fame of John Philip Sousa

and his celebrated "Marches" is world-wide. His latest and greatest popular "hits" are

The Liberty Bell March, Manhattan Beach March.

Played by the Sousa Band during its continental tour to the California Mid-winter Exposition, and at Manhattan Beach during the past summer, these Marches met with instantaneous and phenomenal success, and created a perfect furore. They are now on the top wave of popularity. Each possesses that indefinable "something" and striking originality which characterize Mr. Sousa's work, and which make the hall-mark of his musical genius.

IF YOU PLAY

the Piano, Guitar, Mandolin, Banjo or Zither, you should certainly have a copy of one or both of these Marches, which are arranged most admirably for each of those instruments, as well as for Band and Orchestra.

The arrangement and prices of each, for each March, are as follows.

Piano Solo	.50	Mandolin Solo	40	Banjo and Piano	50
Piano, 4 Hands	1 00	Mandolin and Piano	60	Zither Solo	40
Piano, 6 Hands	1 50	Mandolin and Guitar	50	Zither Duet	50
Guitar Solo	40	2 Mandolins and Guitar	60	Mandolin, Piano and Guitar	75
Guitar Duet	50	Banjo Solo	40	Military Band	50
Orchestra	1 00	Banjo Duet	50		

These Marches are admirably adapted to the "Two-Step."

Any arrangement mailed, post-paid, on receipt of marked price. *Mr. Sousa is under contract to write exclusively for the publishers of these his latest and best Marches.*

THE WEBER PIANOS

are constructed from the musician's standpoint, as well as that of the mechanic; hence these instruments are distinguished from all others by that pure and sympathetic quality of tone that contains the greatest musical possibilities; that consummation of mechanical excellence that admits of

THE MOST DELICATE AND IMPRESSIVE EFFECTS,

while insuring the durability of the instrument; and that uniform superiority that enhances the pleasure of both performer and listener. Constructed from the very best materials, and employing only the most skillful workmanship, these instruments combine the highest achievements in the art of Piano making, and are

Comprehensively THE BEST now Manufactured.

WAREROOMS: FIFTH AVENUE AND SIXTEENTH ST., NEW YORK.

WRITING MACHINES

"Who makes quick use of moments is a genius of prudence."—LAVATER.

ANNOUNCEMENT.

The Wellington.

A NEW WRITING MACHINE.

United States Patents, March 29, 1892. Patented in 15 Foreign Countries.

PRICE \$50.00.

Writing at all times in sight, as when writing with a pen.

Already many different writing machines are in use.

Several are highly meritorious.

There is little room for another, unless at the top.

Valuable improvements are of course always possible.

The state of any art; the expenditure of capital; years of devotion by men of genius and successful experience; the popular demand—all contribute, and it would even be strange if valuable improvements are not still from time to time produced.

Impartial experts of integrity, after exhaustive tests, pronounce the Wellington a valuable improvement in writing machines, standing without a peer at any price. It is offered as such, and the candid judgment of all invited.

Sent to any part of the United States on receipt of price, which will be promptly refunded on return of machine if found unsatisfactory after ten days' use.

We want a representative in every city, town and hamlet in the U. S.

For additional information, circulars or terms to agents, address

"Packer's Tar Soap long ago distanced all its competitors."—*Med. Standard, Chicago.*

THE delicious sense of comfort after being well lathered with Packer's Tar Soap appeals to every one, especially when tired out, grimy or chafed by games or travel.

Children enthusiastically lead the race for it. Well they know how quickly it removes dirt, soothes irritations, refreshes and keeps the skin sweet and soft.

PACKER'S TAR SOAP LEADS THE RACE.

Cloaks · Suits · Furs.

If you know of a place where you could get your cloaks, furs and tailor-made suits made to order for less than you can buy them ready made, would n't you patronize that place?

We are manufacturers of cloaks, jackets, furs and tailor-made suits, and make every garment especially to order, thus insuring a perfect fit. By selling direct to you we save you the jobber's and retailer's profits, amounting to from \$5 to \$20 on every garment. All orders are filled promptly, and we pay all express charges. Our Fall and Winter catalogue illustrates

Ladies' Jackets from \$5 up,
Capes from \$5 up,
Plush Jackets, Plush Capes,
Usters, Fur Capes,
Tailor-Made Suits, etc.

We will be pleased to send you our catalogue, together with our perfect-fitting measurement diagram, a 48-inch tape measure and more than FORTY SAMPLES of the cloths, plushes and furs from which we make our garments, on receipt of four cents postage. Our samples include a complete line of both rough and smooth cloths in black and all the leading Fall shades, together with a line of seal plushes and samples of all the fashionable furs. You may select any garment and we will make it to order for you from any of our materials. Our garments fit perfectly, and always give the wearer a stylish and refined appearance. We also sell coatings, plushes and fur edgings by the yard. Please mention THE CENTURY when you write us.

THE NATIONAL CLOAK CO.,
152 and 154 West 23d Street, New-York.

BEST & CO

6.75

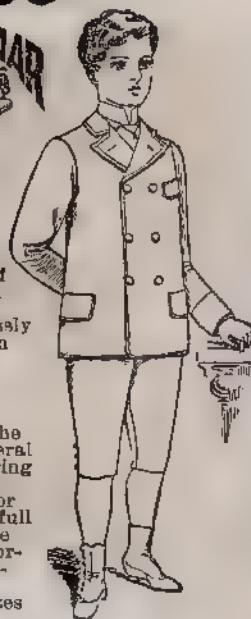

For this double breasted Suit, made of a silk mixed diagonal cassimere that was manufactured expressly for us by an American mill, and is an exact reproduction of an English cloth that we sold for \$12.00 a Suit.

It is fully equal to the foreign goods in general appearance and wearing qualities—handsome and dressy enough for any occasion except full dress, and at the same time, for school and ordinary wear, its durability makes it the most economical—Saves 5 to 15 years.

This Suit is a good example of the advantage of buying children's clothing where their outfitting is made a special business. Send for samples and measure blanks.

We furnish a general catalogue of children's wear. Postage 4 cents

60-62 West 23d St., N. Y.

N. B.—Ypsilanti Underwear received more awards at World's Fair than any competitor, foreign or domestic. Also FIRST PRIZE at Midwinter Fair, California.

Bicycling for ladies and gentlemen is rendered doubly pleasant, easy, and comfortable by the wearing of the right kind of underwear. The kind that don't roll up, crease, or wrinkle, but fits perfectly and yields without binding to all motions of the body.

That kind is the Ypsilanti Union Suits.

Send for new catalogue and price list, also new book on men's underwear, entitled:

"Modern Underwear, and How to Wear it." They are free.

HAY & TODD, MFG. CO., Ypsilanti, Mich.

Copyrighted, 1894

Don't be Deceived when told that some other binding is "just as good" as the

"S. H. & M."
First Quality Bias Velveteen Skirt Bindings.

The "S. H. & M." outwears several of any others; is unequalled for quality, uniformity and service, and it saves the expense of frequent renewals.

Look for "S. H. & M." First Quality on the label of every roll.
